DISCOVER MORE

The legend of Harley-Davidson is built on the millions of riders living their own. Each day. Every ride. Each and every rider living for more, turning the curves in the road into a story worth hearing. And it all starts with building your own bike, creating a custom of one that could be no one else's, and discovering there's so much more out there for you than you ever thought.

GENUINE MOTOR PARTS & ACCESSORIES

YOUR PERFECT FIT

Will you be turning heads on city streets, or crossing countries off your list? Getting more out of your ride is completely about how it fits. Fit is everything. With a few adjustments, we can help you customize your ride to fit you like a glove.

The perfect fit starts with the control triangle: the seat, foot, and hand location. All three are crucial. Each model has specific features that affect the control triangle.

PROFILING

Comfort and beauty. Pulled back or high handlebars with a forward foot position for casual, laid-back rides.

SPORT

This is all about feeling total control. With tighter handling and flat handlebars, this forward-leaning, aggressive position shifts your weight toward your legs and arms, putting you in a more responsive position and ready for the road ahead.

CRUISING

Think of this as the best of both worlds. Tall, pulled-back handlebars and a deeper seat with mid-forward controls, you get style, comfort and better balance for your ride.

TOURING

Comfort in the saddle equals comfort for miles. For extra-long hauls, ride with an upright seating position. A deep, wide seat keeps you forward, and wide handlebars and footboards keep you comfortable.

STOCK HANDLEBARS WITH RISERS

If the stock handlebar has the correct width and hand position for you, but seems just a little too far away, riser kits can help bring the controls within reach. Straight and curved risers are available for many models and handlebar combinations.

HANDLEBAR POSITION

When power is at your hands, you better feel comfortable turning it loose. That starts with the handlebars: finding the right fit for your hands, wrists, arms, shoulders, and back. Every rider needs a different combination and you can get the perfect fit by adjusting three simple aspects:

1

WIDTH

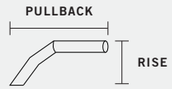

Measured from the end of one hand grip to the other. Touring calls for a wider bar, while sport riding is best with lower end-to-end width.

2

RISE

Vertical distance between the handlebar's tip and its base. Adding risers can help bring the controls up or down, to be more comfortably in reach.

3

PULLBACK

Paired with the right rise and width, the right pullback brings the bars closer to the rider.

BENEFITS

A reposition of the grip point reduces the stress most riders feel in their neck, back and shoulders.

By relocating the bars closer to the rider, the motorcycle becomes much easier to steer and control.

Risers provide immediate relief to those stretching to reach their handlebars. Adding pullback risers will bring the handlebars approximately 5" closer to the rider (compared to stock). Perfect for riders with shorter reach, or riders who prefer sitting a little straighter in the saddle.

ENHANCING YOUR RIDE

When you're on the road you have to feel good in the saddle. Your bike should be an extension of you. It's how you see more, do more, go more. Adjusting the seat, controls, and suspension can customize your bike to your stature for the most natural, comfortable fit.

PROBLEM

Putting a tall rider in tight quarters can strain joints and restrict movement. A knees-high position puts added pressure on your backbone and can interfere with the handlebar in full-lock turns. The riding posture quickly becomes uncomfortable and distracting as you rack up the miles.

SOLUTION

FOOT CONTROLS

Getting tired out on the road isn't an option. Adjusting foot placement helps you fit your ride and reduces fatigue. A slight repositioning of your feet can go a long way — letting you ride more. That's the goal after all.

SEAT

Park it someplace nice. Equal parts ergonomics and comfort, the seat relieves stress on your hips and lower back, and adjusts your reach to the handlebars and controls. Riding with someone? Get them involved and test-ride a seat at your local dealer.

SUSPENSION

Feel more comfort and control. Adjust the height of your bike to let your feet be firmly planted and flat on the pavement. This also lowers the center of the motorcycle's mass and gives you more control while riding.

FINDING YOUR SEAT

Together with your Harley-Davidson® dealer, you can find the right seat for more comfort, more style and more control.

SHORTER RIDER

BADLANDER® SEAT

The frame-hugging rider seat and the slim, tapered passenger pillion visually stretch the bike and enhance the slammed look. This low, lean look also offers the benefit of a reduced seat height, which is ideal for riders who want the lowest possible seat height.

LONG-HAUL SUPPORT

LOW-PROFILE SEAT

Shaped to place the rider "in" the bike – not on top of it. The slight bucket shape cradles the rider and keeps them from sliding back during acceleration. This seat also distributes your weight across a wide surface area, reducing pressure points.

SHORTER INSEAM

SUPER REACH

Super Reach forward position seats are designed to move riders 5'0" to 5'4" even closer to the controls, and brings the legs closer together so feet can rest firmly on the pavement. It can move the rider up to 1.5" closer to the controls compared to a stock seat.

LONG-LIMBED RIDER

TALLBOY® SEAT

The Tallboy® seat moves the rider back up to 2" compared to stock seats. The new position allows additional leg and arm movement for riders 5'9" to 6'1". The bucket design of the Tallboy seat also provides rider back support.

LOWER BACK SUPPORT

SUNDOWNER™ SEAT

The Sundowner™ Seat provides the maximum in long-riding comfort. This unique seat features a deep bucket design that cradles the tailbone and provides back support for the rider. The narrow nose of the seat was sculpted to bring the legs closer together.

HARSH ROAD CONDITIONS

HAMMOCK TOURING SEAT

A revolutionary suspension system in the seat helps protect rider and passenger tailbones from harsh road impacts. Internal suspension prevents "bottoming out" and provides improvement in comfort and endurance over the long haul.

CHOOSE YOUR ROAD

Decide on the ride that defines you. Are you looking for endless horizons?
Or is the buzz of city streets more your style? Maybe a little of both? With Harley-Davidson,
it's about the versatility to do more with a wide range of detachable accessories
to bring your story to the streets, no matter where they might lead.

A PLAN FOR THE LONG HAUL

Almost any Harley-Davidson motorcycle can be outfitted to accommodate longer-haul adventures. Solo and stripped down, two-up and fully loaded, or anywhere in between. Saddlebags, luggage racks and windshields are the key options to find the right combination.

SOLO TOUR-PAK®

The Tour-Pak® carrier offers tons of storage. The Solo Mounted Rack positions the Tour-Pak pad for maximum rider back support.

TWO-UP

Saddlebags carry the essentials, while a Sissy Bar backrest pad provides hours of passenger comfort.

TWO-UP TOUR-PAK®

Designed to complement the styling of your bike. The color-matched Tour-Pak carrier adds increased storage for you and your passenger—across town or cross-country.

TRADITIONAL LEATHER SADDLEBAG

A classic leather bag with the versatility to dress up or down your bike for any ride.

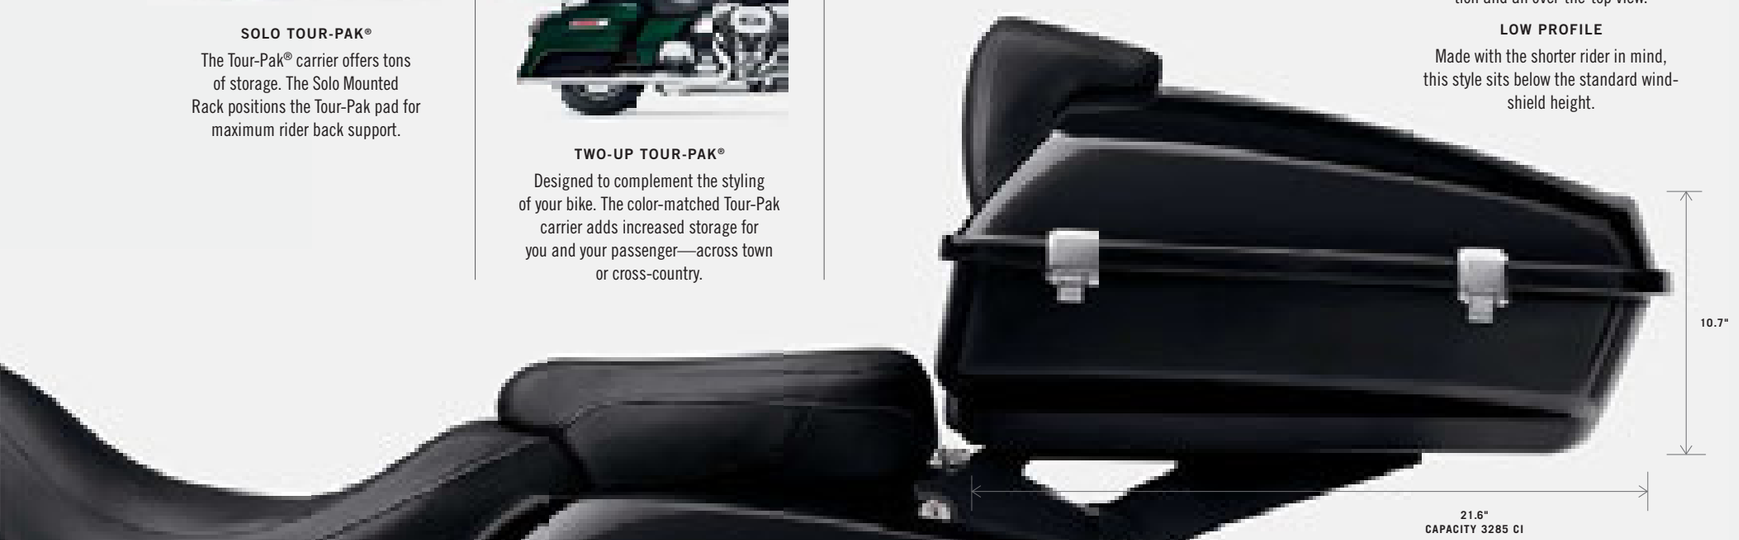

SWINGARM SADDLEBAG

With enough room for the essentials, this bag eliminates the need to stuff your pockets or bungee a bag across the passenger pillion.

TOURING LUGGAGE

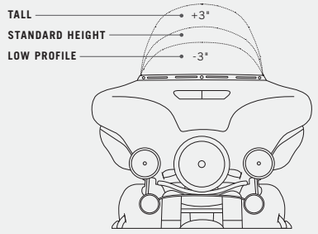

Styled to complement and match your bike's lines, these provide easy on and off storage.

Chopped Tour-Pak, shown left, offers a low profile shape, styled to complement a long and lean Touring bike.

KEEPING YOU COVERED

Detachable windshields divert the air, rain, and road debris away from the rider,
adding hours, days, and maybe a few border crossings to your ride.
Less fatigue equals more riding.

TALL

For the taller rider, this style extends 3" above standard height while preserving both visibility and protection.

STANDARD HEIGHT

Designed for a rider about 5'10", standard height provides weather protection and an over-the-top view.

LOW PROFILE

Made with the shorter rider in mind, this style sits below the standard windshield height.

KING SIZE TOURING

Maximum Coverage. The ultimate in protection. Manages airflow and visibility for riders of almost any size and almost any height, with both low and high profiles.

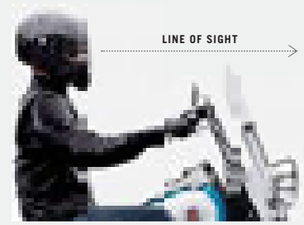

COMPACT

Standard Coverage. A cleaner look with a whole lot of protection from whatever the road throws at you.

SUPER SPORT

Minimal Coverage. Go more aggressive. These windshields are designed to give you a sleeker, lower and leaner appearance.

LINE OF SIGHT

Selecting a windshield that tops out just below your line of sight eliminates having to look through bug spots, condensation, and road grime without compromising your field of vision. An unobstructed view makes for safe and enjoyable riding.

INSTALLING A DETACHABLE WINDSHIELD

Designed to be installed or removed without tools in seconds, a detachable windshield gives you the freedom to define your ride at the drop of a hat. Ride across the country protected from the elements, then quickly remove the windshield to hit the streets in style.

PERSONALIZE YOUR RIDE

Your style is obvious at any speed. So, choose the accessories that reflect you. There are two ways to customize to get you more.

Cover: Mirrors, grips and chrome are simple touches that go a long way to making your bike stand out.

Custom: Exactly that—fully custom. The ultimate in making every piece of the bike one-of-a-kind and only yours with the help of your Harley-Davidson dealer.

STYLE STRATEGY: THE 3 ZONES

Focus on larger accessories first—ones with the biggest impact on your bike's appearance—then work your way down to the subtle details that complement those choices.

Windshields & LED Headlamps

A. QUICK-RELEASE SUPER SPORT WINDSHIELD

Reduces the pounding of wind and shower of bugs but keeps the wind-in-the-hair feeling. Ideal for a cool morning ride, the sleek profile of the Super Sport Windshield hugs the front headlamp for a sporty look. The windshield mounts to the fork tubes with elegant die-cast lever locking clamps, so the windshield does not require any "leave-behind" docking hardware. You get quick on-and-off convenience and a clean, custom look. No tools are required and the kit includes everything needed to install the windshield.

57400192	Light Smoke.	**$319.95**

Fits '15-later XG models. Installation requires removal of Original Equipment headlamp visor. Models equipped with a front mounted license plate require separate purchase of License Plate Bracket P/N 67900227. Windshield dimensions: Overall height 25.0"; width – 20.1".

B. DAYMAKER™ LED HEADLAMPS

Cut through the night. Harley-Davidson® LED Lamps are brighter and whiter in color and provide a superior light pattern over standard incandescent lamps. Compared to the yellow light of a traditional halogen bulb, the LED lamp produces a "Daylight Color Impression" that appears more natural to the user. Headlamps feature horizontal "D-shaped" lenses that focus light into a pool in front of the motorcycle and separate high beam and low beam projector lenses that provide a focused beam of light ahead. Lamps are available in your choice of brilliant chrome or gloss black background to match your styling direction. The solid-state LEDs are designed for long life and the shock- and vibration-resistant lamp assembly mounts into existing light housings. Installation is quick and easy and the plug-in lamps connect to the factory headlamp wiring. The LED lamps are DOT and ECE compliant.

Fits '15-later XG models.

C. CAFÉ SOLO SEAT

D. REACH SEAT

E. TALLBOY SEAT

C. CAFÉ SOLO SEAT

There's something about the placement of the rider that makes the Cafe Solo Seat special. The one-up design and the high back pad hold the rider in place and provide a direct connection to the bike. You sit "in" the bike and your hands and feet reach naturally to the controls. The low-slung pad, narrow nose and the tapered tail enhance the bike's sporting profile and pays homage to the heritage of the iconic Café Racer style.

52000168 **$219.95**
Fits '15-later XG models. Seat width 11.25".

D. REACH® SEAT

Designed specifically for riders requiring a close to the bar riding position, this Reach® Seat is shaped to place the rider in a comfortable and confident relationship to the hand and foot controls. The seat moves the rider approximately 1.5" lower and 1.25" forward and the 1.25" slimmer front profile brings the legs closer together for an easier reach to the ground at a stop. The Reach Seat features a stepped profile that keeps the rider from sliding back during acceleration.

52000123 **$199.95**
Fits '15-later XG models. Seat width 10.25"; passenger pillion width 6.75".

E. TALLBOY® SEAT

The correct riding position can help a tall rider sit comfortably on the bike, and avoid leg cramps and back strain during a long day in the saddle. For riders with a longer inseam, a Tallboy® Seat will put you on the road to fatigue-free riding. Designed to move the rider 1.25" up and 2.5" back from the stock seating position, a Tallboy Seat can eliminate the "knees-high" riding position and effectively places the body for a natural arm and leg reach to the controls.

52000124 **$199.95**
Fits '15-later XG models. Seat width 10.5"; passenger pillion width 7.5".

Notice: The prices appearing in this catalog are the manufacturer's suggested retail prices. Actual retail prices may vary.

WHAT'S NEW

2017 XL883N Harley-Davidson® Iron 883™

Every year we look for more ways to take your Sportster® motorcycle from factory to custom. Here are just a few of the latest Genuine Motor Parts & Accessories to help you make your dream bike a reality - because every legend is an original.

PRO STREET TUNER

The Screamin' Eagle® Pro Street Tuner is designed to simplify management of street-compliant performance calibrations as EPA-compliant performance modifications are made. It easily allows the rider or the technician to view and evaluate engine operating parameters.

PIGGYBACK SHOCK KIT

Experience the ultimate in handling and ride quality with great performance and style. Completely adjustable for the solo rider, set the sag with an adjustable preload, then fine tune the system with adjustable compression and rebound damping.

CAFÉ SOLO SEAT

This one-up design features a high back pad that holds the rider in place and provides a direct connection to the bike. You sit "in" the bike letting your hands and feet reach the controls naturally. The low-slung seat, narrowed nose and tapered tail enhance the bike's sport profile and pays homage to the iconic Café Racer style.

TANK KNEE PAD KIT

These self-adhesive rubber knee pads provide a touch of old-school style. The rich black rubber pads feature tapered ribs and a raised Bar & Shield logo to protect the surfaces your legs contact on the tank.

SCREAMIN EAGLE® STREET CANNON SLIP-ON MUFFLERS

These street compliant high-flow mufflers have been specifically tuned to deliver an aggressive exhaust note and improved performance while preserving the peace with your neighbors.

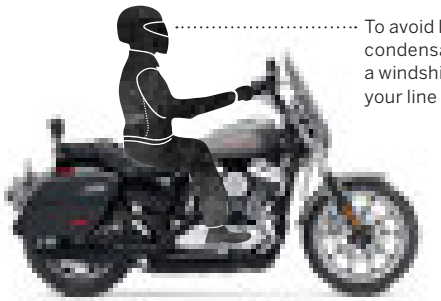

CLUBMAN HANDLEBAR

The Clubman handlebar combines an aggressive tank-hugging riding position with a lane-splitting narrow profile.

DEFY THE WIND

At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders. Take the pressure off with an easy-to-install detachable windshield. Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.

SEEING CLEARLY

To avoid looking through bug spots, condensation and road grime, select a windshield that tops out just below your line of sight.

SCRATCH-RESISTANT HARD-COATED POLYCARBONATE SHIELD

KEEPING YOU COVERED

SUPER SPORT
Eliminates wind and debris, but keeps the wind-in-the-hair feeling. Ideal for a cool morning ride to the office, the sleek profile hugs the front lamps for a sporty look.

COMPACT
Traditional king-sized shape with a minimalist edge. For Harley-Davidson® custom and cruiser models, the Compact windshield provides wind and weather protection for everyday riding.

TOURING
Add maximum weather protection to your sporting motorcycle. Contoured to divert the wind around the rider's helmet and hands, a Touring windshield means long-ride comfort.

READY FOR TAKE-OFF

Designed to be installed or removed without tools in seconds, a detachable windshield gives you the freedom to define your ride at the drop of a hat. Ride across the country protected from the elements, then quickly remove the windshield to hit the streets in style.

ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

SPORTSTER® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

POSITION SEATS

Designed to place the rider in the best relationship to the controls, Reach® and Tallboy® seats position short and tall riders for a comfortable extension of the arms and legs.

LOW-PROFILE SEATS

These saddles combine radical styling with a "deep-in-the-bike" riding position. Long and lean, Badlander® seats bring you lower to the ground than most other seats.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape holds you in place and provides additional back support.

SUNDOWNER™ SEATS

Designed to maximize long-range comfort, Sundowner Seats feature a deep bucket design that cradles the rider and provides a low slung "in-the-bike" seating position.

A. SUPER REACH® SOLO SEAT

Get a little bit closer. Super Reach® forward position seats are designed to move riders with a shorter inseam even closer to the controls and to bring the legs closer together so that your feet rest firmly on the pavement. After hundreds of hours of on-road and ergonomic testing, the seat shape and foam density were selected as the ideal position for riders 5'-0" to 5'-4" tall. The Super Reach Seat moves the rider 1.5" closer to the controls compared to stock seat on XL883L model, and 2" closer and .5" lower compared to stock seat on XL1200C model. The nose is 1.0" narrower than the stock seat, and it is tastefully sculpted to look great with any size Sportster fuel tank. The combination of premium textured and smooth vinyl surfaces and charcoal gray stitching and embroidered Bar & Shield logo really set the seat apart. For the ultimate solo touring setup, add the Quick Release Rider Backrest P/N 52300245, and for a two-up ride, add the matching Passenger Pillion P/N 52400125.

52000207 **$239.95**
Fits '10-later XL models. Seat width 9.5".

B. REACH SEAT

Designed specifically for riders requiring a close to the bar riding position, without compromising comfort. This seat positions the rider approximately .5" forward, closer to the hand and foot controls. The narrow front profile brings your legs closer together to help you plant your feet firmly on the ground. The slightly bucketed rider seat offers lower back support and features a textured insert to prevent you from sliding around while riding.

51738-07 **$299.95**
Fits '07-later XL models equipped with 4.5 gallon fuel tank. Models not equipped with passenger pegs require separate purchase of Passenger Footpeg Kit P/N 50203-04 ('04-'13 models) or P/N 50500270 ('14-later models). Seat width 14.0"; passenger pillion width 10.0".

51737-07 **$299.95**
Fits '07-later XL models equipped with 2.2 or 3.3 gallon fuel tanks. Models not equipped with passenger pegs require separate purchase of Passenger Footpeg Kit P/N 50203-04 ('04-'13 models) or P/N 50500270 ('14-later models). XL883N, XL1200N and XL1200X models also require separate purchase of Retention Washer P/N 7487. Seat width 14.0"; passenger pillion width 10.0".

C. TALLBOY® SOLO SEAT

Stretch your legs in style. The Tallboy® Solo Seat allows additional leg and arm movement for the long-limbed rider and the long seating space permits fore and aft repositioning while on the open road. The Tallboy Solo Seat moves the rider back 2.5" and up 2.0" compared to the Original Equipment seat on the XL883L model, and 2.0" back and 1.0" up compared to stock seat on XL1200C models. The seat shape and foam density were carefully selected after hundreds of hours of real world testing, and are ideal for riders 5'-9" to 6'-2" tall. The seat features a tapered tail to minimize the profile, and it is crafted with premium vinyl surfaces for durability.

52000209 **$249.95**
Fits '10-later XL models. Not compatible with Rider Backrest P/N 52300245. Seat width 12.5".

COMFORT ON THE GO

With a detachable backrest and luggage rack, your bike can go from a stripped-down afternoon cruiser to a fully loaded two-up touring machine in seconds. Comfort- and convenience-driven accessories make for a less stressful ride.

THE RIGHT COMBINATION

BUILD YOUR OWN

A detachable sissy bar upright and backrest pad is the starting point for a complete touring machine. Start by shopping the following pages and selecting all the components required for your particular model.

EQUIPPED FOR THE MILES AHEAD

Solo and stripped down, two-up and fully loaded, or anywhere in between, you can tailor any Harley-Davidson® motorcycle to meet the demands of the highway.

JUST THE BASICS

Stripped to the essentials, your ride is ready for your commute or for a night on the town. Detachable accessories let you install and remove the gear required for today's trip.

HIT THE ROAD

Go it alone. Saddlebags hold a change of clothes, a rain suit and the basic travel gear. And a solo rack and soft bag can be added to carry the souvenirs you pick up on the way.

SOLO TOURING

The ultimate road trip. The detachable saddlebags and Tour-Pak® offer tons of storage space, and the Solo Mounting Rack positions the Tour-Pak Pad for maximum rider back support.

TWO-UP DAY TRIPPING

Take a friend. Saddlebags carry your clothes and the essentials, the luggage rack and a duffle bag hauls the rest, and a passenger backrest provides hours of riding comfort.

Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a H-D® Detachables™ Sideplate Kit and appropriate Docking Hardware to make adding or removing a detachable accessory a simple "slide and click" proposition.

H-D® Rigid Sideplates

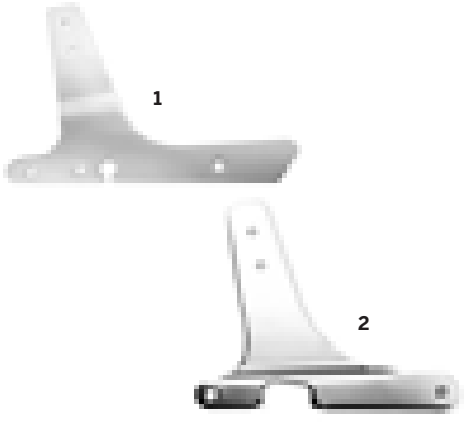

Add practical comfort and support for your passenger. Rigid Sideplates support are the anchor for sissy bar uprights, backrest pads and luggage racks and hug the rear fender strut for a clean streamlined look. Manufactured and tested to rigorous Harley-Davidson® standards, these sideplates are designed to specific model application for exact fit.

Fits '04-later XL models (except XL1200T). Does not fit models equipped with saree guards.

Start with Harley-Davidson Detachables Sideplates, and add your choice of sissy bar upright and pad to make removing the passenger backrest is a simple "slide and click" operation. Manufactured and tested to rigorous Harley-Davidson standards, installation requires separate purchase of model-specific Docking Hardware Kit.

FINDING THE RIGHT FIT

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control, and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

SUSPENSION
Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

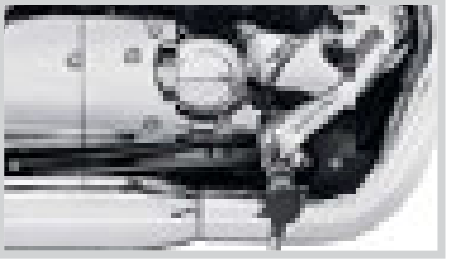

ESTABLISH YOUR POSITION

HANDLEBARS
Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

SEATS
Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

FOOT CONTROLS
Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT – SPORTSTER MODELS (STANDARD HEIGHT)

A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT – SPORTSTER MODELS (LOW PROFILE)

A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT – SPORTSTER® MODELS

This Single Sided Cartridge Fork provides improved handling performance by keeping the tire in contact with the road surface. Tuned to work in concert with the Premium Emulsion Rear Shocks, the fork damping is controlled by a specifically calibrated piston and valve stack. Unlike typical orifice damping, the piston/valve system helps the cartridge fork achieve a linear damping force curve for consistent feel throughout the compression and extension of the front suspension. The cartridge allows the forks to react quickly to rough roads, inspiring rider confidence in sweeping corners. The compression piston provides excellent low speed damping for a better rider feel, and the rebound spring provides a smoother feel during topping. The cartridge fork resists bottoming and dive, and the triple rate spring and oil lock allows the forks to absorb bumps even under hard braking – giving the rider more control while resisting wheel hop. A perfect addition during the installation of chrome or gloss black lower fork sliders, the kit includes fork pipe, cartridge, fork bolts, main springs and oil seals.

B. PREMIUM RIDE EMULSION SHOCKS – SPORTSTER MODELS

B. PREMIUM RIDE EMULSION SHOCKS – SPORTSTER MODELS

Experience a comfortable and confidence-inspiring ride – no matter the pavement conditions – with Harley-Davidson® Premium Ride Emulsion Shocks. These fast shocks offer enhanced compression and rebound damping control when compared to typical twin-tube shock absorbers. The nitrogen gas charged shocks resist oil aeration and work with the internal valve stack to provide superior damping control in the twisties. The large pistons and low viscosity high-performance oil allow these shocks to react quickly to impacts and keep the tires tracking the road surface. With the addition of urethane bumpers, you get a controlled ride and minimized bottoming harshness. The locking threaded adjustment lets you fine tune the spring preload to your current riding conditions – whether a solo run on the back roads or a fully-loaded two-up freeway tour. Kit includes left and right shock and preload adjustment spanner wrench.

C. PERFORMANCE SUSPENSION KIT – XR1200

Maximize the canyon-carving ability of your XR1200 motorcycle with this complete Performance Suspension Kit. Fully-adjustable light-weight suspension system features Showa's new Big Piston Front fork (BPF) design. The BPF eliminates many of the internal components used in a cartridge-type fork, simplifying construction and resulting in lighter overall fork weight. The large-diameter of the BPF's internal piston allows a reduction in damping pressure, for better feedback and smoother action. This performance suspension kit also provides a very controlled feeling which leads to more rider confidence. The BPF's rebound and compression damping force settings are easily fine-tuned via two adjuster screws located on top of the fork bolts. The spring pre-load is adjusted via a M5 hex screw on the axle holders. The rear Showa® shocks feature 36mm pistons with piggyback nitrogen-charged reservoirs. The compression damping can be adjusted via a knob on top of the piggyback reservoir. The rebound is adjusted with a thumb wheel on the lower clevis. Rear spring pre-load is also adjustable on the shock for optimum 1G sag. The kit includes one set of Big Piston Front Forks and one set of rear shocks.

SPORTSTER® FOOT CONTROLS
A long stretch to the controls or a "knees-high" cramped riding position puts strain on your body after even a short ride. Repositioning your feet on the controls relieves muscle tension, takes pressure off the tail bone, and reduces rider fatigue. Where your feet contact the controls can often determine how many miles you can put on in a day.

Many Sportster® models can be equipped with the following foot control configurations:

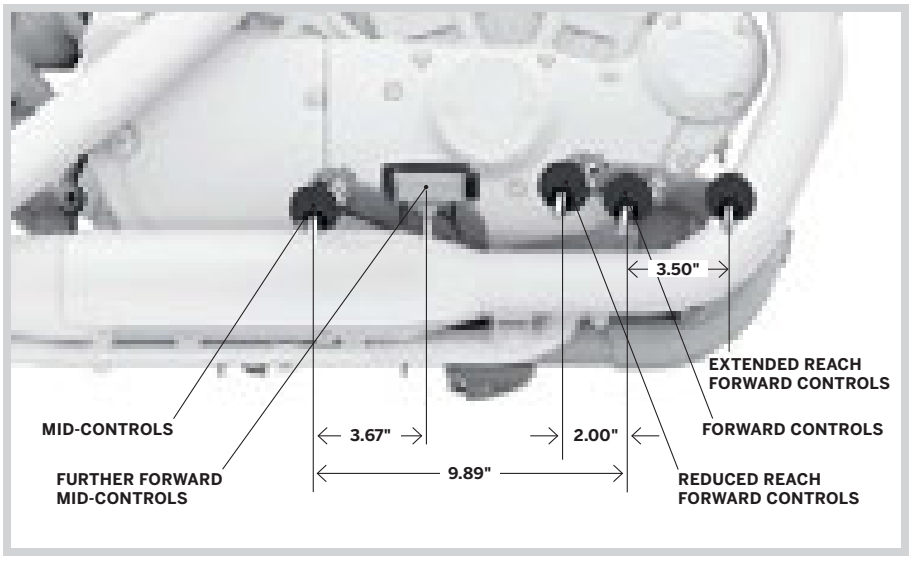

MID-CONTROLS:
Original Equipment on some models, Mid-Controls position the feet below the knee for a sporting riding posture.

FURTHER FORWARD MID-CONTROLS:
Achieves a comfortable foot-down riding position for the taller rider.

REDUCED REACH FORWARD CONTROLS:
Provides a foot-forward boulevard style without straining to reach the controls.

STANDARD FORWARD CONTROLS:
Places the legs for a "feet-in the-wind" laid back profiling posture.

EXTENDED REACH FORWARD CONTROLS:
Accommodates the tallest rider by stretching the leg a full 3.5" further forward.

The forward location provides an open path for your feet to aid maneuvering the bike while parking and improves access to the jiffy stand for a shorter rider. Kit includes control mounts, brake and shift levers, brake rod, mini-footboards with wear pegs and all hardware necessary to convert your mid- or forward-control equipped Sportster® model.

A simple push and the fuel filler cap pops up to provide ample grip, even while wearing gloves. Easy to install, the cap assembly screws into position and the self-adhesive decorative ring finishes the look. Complete kit includes screw-in mount, pop-up cap and matching trim ring.

Fits '98-later XL models equipped with 3.3 gal (12.5 L) fuel tank.

H. SIDE-MOUNT LICENSE PLATE KIT

Add a clean, custom look to the rear fender. This stylish kit moves the license plate from the fender to a side-mount location, visually lowering the bike's profile and opening up the view of the rear end. This strut-mounted hinged frame conceals the license mounting hardware and features a smooth back that hides the unfinished side of the plate. Kit includes LED license plate illumination and a curved Bar & Shield medallion, shaped to conceal the original license mounting holes in the fender. Purchase of tail lamp without license illumination window is recommended for models with center-mounted tail lights.

NOTE: License plate location and fold-away feature is regulated in many areas. Check local laws before installation.

Fits '04-later XL models (except XL1200T). Models with Original Equipment side mount license plate mount require additional purchase of Left Reflector Mount Bracket P/N 68857-07 and Reflector P/N 69490-07. Will not fit some International Specification '14-later XL883N models with Original Equipment LED Turn Signals. See your dealer for details. Will not fit models equipped with rigid mount saddlebags, rigid mount sissy bars and Turn Signal Relocation Kit P/N 68732-02A and 68733-02A.

I. CHOPPED REAR FENDER KIT*

Complete "bolt-on" fender kit includes everything you need to convert your '04-later Sportster® model to the chopped rear fender look. Available in Vivid Black or Primed finish, this kit can be installed with simple tools and requires no frame modifications or fabrication. The chopped fender eliminates the traditional tail lamp and replaces the Original Equipment rear turn signals with "stop-turn-tail" lights for a clean, stripped-down appearance. All you need to add is a side mount or under-fender mount license plate bracket (sold separately).

NOTE: Laws regarding the location of the license plate vary from place to place. Please check with local authorities and obey all applicable laws and regulations.

Fits '07-'09 XL models (stock on XL883N and XL1200N). Requires separate purchase of Side Mount License Plate Assembly P/N 60318-07.

WHAT'S NEW

2017 FXDB Harley-Davidson® Street Bob®

Every year we look for more ways to take your Dyna® motorcycle from factory to custom. Here are just a few of the latest Genuine Motor Parts & Accessories to help you make your dream bike a reality - because every legend is an original.

CHIZELED HANDLEBAR

Achieve ultimate cutting-edge style. The Chizeled Bar features the edgy profile of the classic "Z" bar, and combines the hands-up feel of a mini-ape with the narrow width of a drag bar. The result? A classic chopper attitude.

CHROME MASTER CYLINDER KIT

Replace your stock painted aluminum controls with brilliant chrome, without compromising quality. When combined with Chrome Switch Housing Kit, Chrome Switch Caps, and other Harley-Davidson® Genuine Motor Accessories, this front brake control kit provides a fully-custom look.

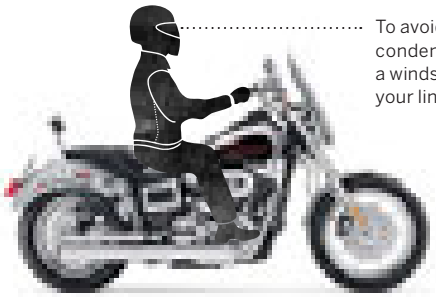

PRO STREET TUNER

The Screamin' Eagle® Pro Street Tuner is designed to simplify management of street-compliant performance calibrations as EPA-compliant performance modifications are made. It easily allows the rider or the technician to view and evaluate engine operating parameters.

DEFY THE WIND

At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders. Take the pressure off with an easy-to-install detachable windshield. Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.

SEEING CLEARLY

To avoid looking through bug spots, condensation and road grime, select a windshield that tops out just below your line of sight.

SCRATCH-RESISTANT HARD-COATED POLYCARBONATE SHIELD

KEEPING YOU COVERED

SUPER SPORT
Eliminates wind and debris, but keeps the wind-in-the-hair feeling. Ideal for a cool morning ride to the office, the sleek profile hugs the front lamps for a sporty look.

COMPACT
Traditional king-sized shape with a minimalist edge. For Harley-Davidson® custom and cruiser models, the Compact windshield provides wind and weather protection for everyday riding.

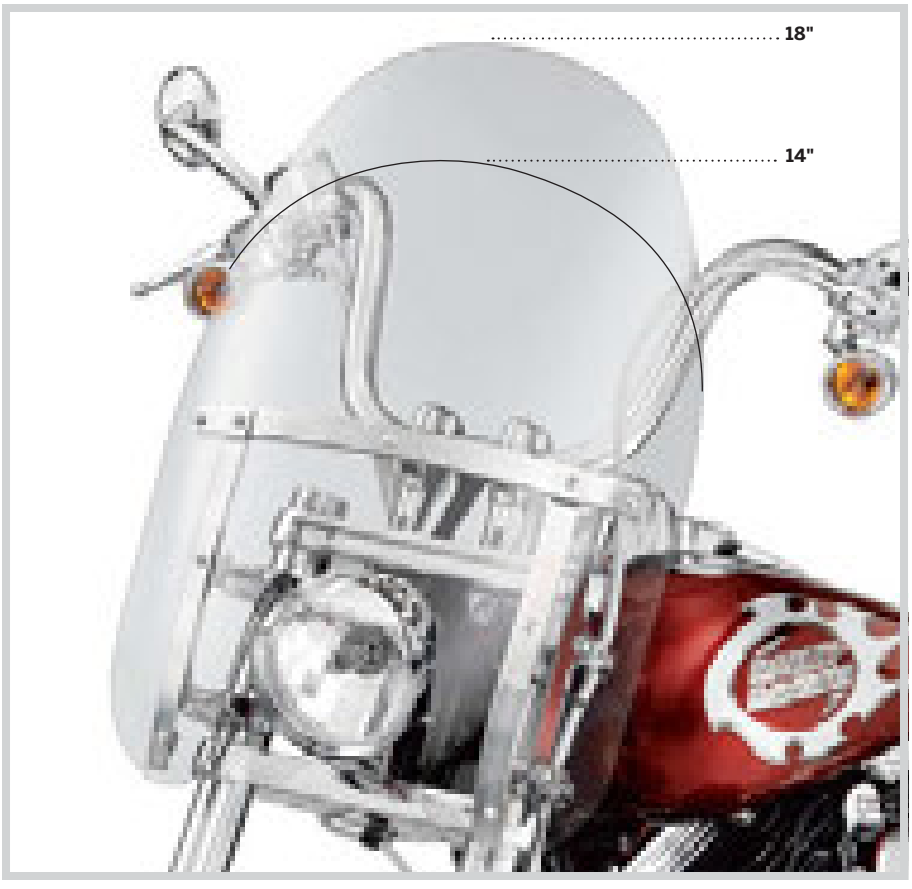

TOURING
Add maximum weather protection to your sporting motorcycle. Contoured to divert the wind around the rider's helmet and hands, a Touring windshield means long-ride comfort.

READY FOR TAKE-OFF

Designed to be installed or removed without tools in seconds, a detachable windshield gives you the freedom to define your ride at the drop of a hat. Ride across the country protected from the elements, then quickly remove the windshield to hit the streets in style.

C. VENTILATOR QUICK-RELEASE COMPACT WINDSHIELD

D. QUICK-RELEASE TOURING WINDSHIELD – LIGHT SMOKE

C. VENTILATOR QUICK-RELEASE COMPACT WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection-molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

The Touring Windshield features an aerodynamic design shaped to provide hours of riding comfort. The additional center width directs airflow past the hand grips and deflects rain and road debris around the rider. The windshield mounts to the fork tubes with elegant die-cast lever-release clamps, so the windshield does not require any "leave-behind" docking hardware. You get quick on-and-off convenience and a clean, custom look. No tools are required and the kit includes everything needed to install the windshield. ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

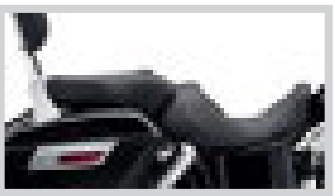

DYNA® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

LOW-PROFILE SEATS

These saddles combine radical styling with a "deep-in-the-bike" riding position. Long and lean, Badlander® and Brawler® seats bring you lower to the ground than most other seats.

POSITION SEATS

Designed to place the rider in the best relationship to the controls, Reach® and Tallboy® seats position short and tall riders for a comfortable extension of the arms and legs.

TOURING SEATS

Designed for comfort, touring seats and passenger pillions offer a broad seating surface to reduce pressure points. The dished shape holds you in place and provides additional back support.

SUNDOWNER™ SEATS

Designed to maximize long-range comfort, Sundowner Seats feature a deep bucket design that cradles the rider and provides a low slung "in-the-bike" seating position.

A. SUPER REACH SOLO SEAT

B. REACH SEAT

C. TALLBOY SEAT

A. SUPER REACH® SOLO SEAT

Get a little bit closer. Super Reach® forward position seats are designed to move riders with a shorter inseam even closer to the controls and to bring the legs about 1.0" closer together so that your feet rest firmly on the pavement. The scooped bucket-shaped saddle is enhanced with added back support padding to move the rider up to 1.0" lower and 3.0" forward. The combination positions the rider closer to the hand and foot controls to offer both comfort and confidence. For a two-up ride, combine the solo seat with the Touring Passenger Pillion P/N 51404-10 (sold separately).

54384-11 **$239.95**

The seat features a textured vinyl insert and a Harley-Davidson logo that shows you are riding in style.

The Tallboy Seat also features a wide pillion for added passenger comfort.

COMFORT ON THE GO

With a detachable backrest and luggage rack, your bike can go from a stripped-down afternoon cruiser to a fully loaded two-up touring machine in seconds. Comfort- and convenience-driven accessories make for a less stressful ride.

THE RIGHT COMBINATION

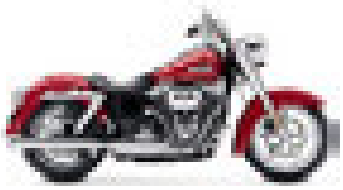

BUILD YOUR OWN

A detachable sissy bar upright and backrest pad is the starting point for a complete touring machine. Start by shopping the following pages and selecting all the components required for your particular model.

EQUIPPED FOR THE MILES AHEAD

Solo and stripped down, two-up and fully loaded, or anywhere in between, you can tailor any Harley-Davidson® motorcycle to meet the demands of the highway.

JUST THE BASICS

Go it alone in style. Stripped to the essentials, your ride is ready to prowl the streets. Detachable docking hardware makes the process an easy "slide and click" proposition.

SOLO TOURING

Ride like you're on a mission. The saddlebags offer tons of storage space, and the detachable windshield prepares you for long hours on the open highway.

TWO-UP DAY TRIPPING

Just strap a packed duffle bag to the luggage rack, and let your passenger lean back against the sissy bar backrest pad for hours of back road riding comfort.

TWO-UP TOURING

The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully equipped to go wherever you want, for as long as you want.

Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a H-D® Detachables™ sideplate kit and appropriate Docking Hardware to make adding or removing a detachable accessory a simple "slide and click" proposition.

H-D® Rigid Sideplates

Add practical comfort and support for your passenger. Rigid Sideplates supports are the anchor for sissy bar uprights, backrest pads and luggage racks, and hug the rear fender strut for a clean, streamlined look. Manufactured and tested to rigorous Harley-Davidson standards, these sideplates are designed to specific model application for exact fit.

FINDING THE RIGHT FIT

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control, and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

SUSPENSION

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

ESTABLISH YOUR POSITION

HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

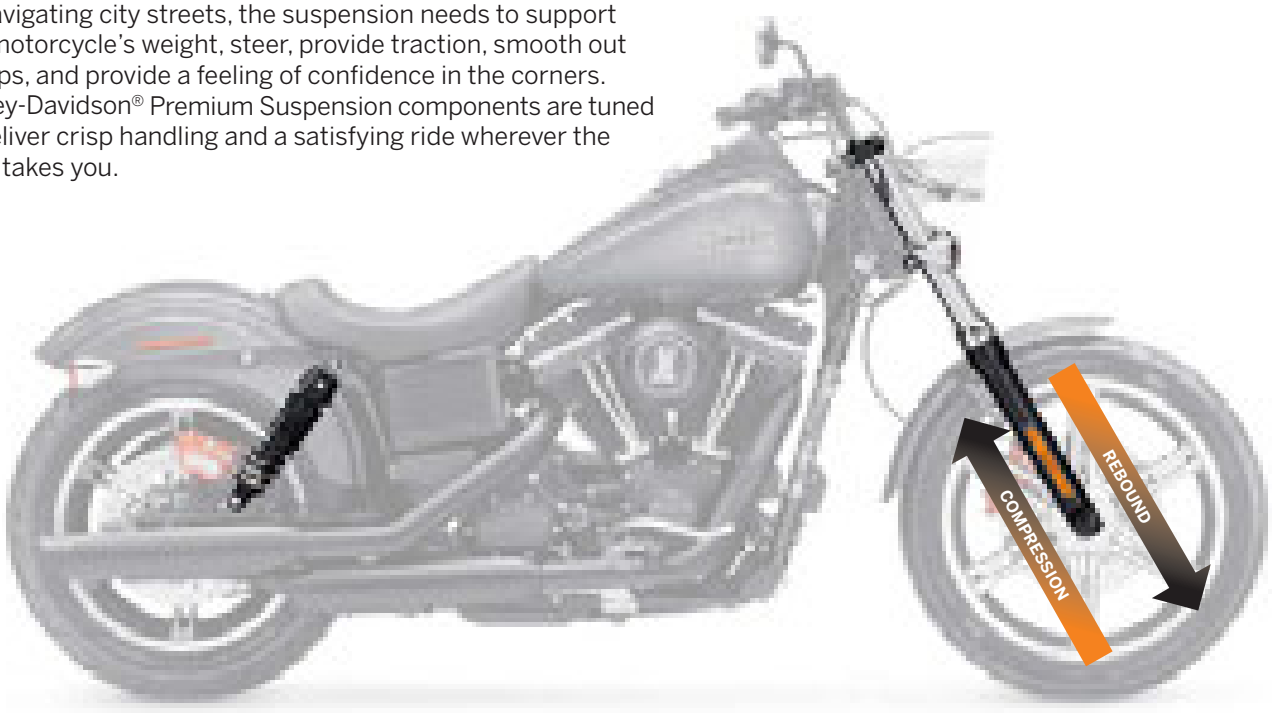

FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

PREMIUM RIDE SUSPENSION

Whether you're cruising the highway, carving up a county road, or navigating city streets, the suspension needs to support the motorcycle's weight, steer, provide traction, smooth out bumps, and provide a feeling of confidence in the corners. Harley-Davidson® Premium Suspension components are tuned to deliver crisp handling and a satisfying ride wherever the road takes you.

B. PREMIUM RIDE EMULSION SHOCKS

C. PREMIUM PROFILE LOW REAR SUSPENSION KIT

A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT

This Single Sided Cartridge Fork provides improved handling performance by keeping the tire in contact with the road surface. Tuned to work in concert with the Premium Emulsion Rear Shocks, the fork damping is controlled by a specifically calibrated piston and valve stack. Unlike typical orifice damping, the piston/valve system helps the cartridge fork achieve a linear damping force curve for consistent feel throughout the compression and extension of the front suspension. The cartridge allows the forks to react quickly to rough roads, inspiring rider confidence in sweeping corners. The compression piston provides excellent low speed damping for a better rider feel, and the rebound spring provides a smoother feel during topping. The cartridge fork resists bottoming and dive, and the triple rate spring and oil lock allows the forks to absorb bumps even under hard braking – giving the rider more control while resisting wheel hop. A perfect addition during the installation of chrome or gloss black lower fork sliders, the kit includes fork pipe, cartridge, fork bolts, main springs and oil seals.

45400058 **$349.95**
Fits '06-later Dyna® models (except FLD, FXDWG and '07-'08 FXDSE). Original Equipment on FXDLS models.

B. PREMIUM RIDE EMULSION SHOCKS

Experience a comfortable and confidence-inspiring ride – no matter the pavement conditions – with Harley-Davidson® Premium Ride Emulsion Shocks. These fast acting monotube nitrogen gas-charged shocks offer enhanced compression and rebound damping control when compared to typical twin-tube shock absorbers. The nitrogen gas charged shocks resist oil aeration and work with the internal valve stack to provide superior damping control in the twisties. The large 36mm pistons and low viscosity high-performance oil allow these shocks to react quickly to impacts and keep the tires tracking the road surface. You get a controlled ride and minimized bottoming harshness transmitted through the frame. The locking threaded adjustment lets you fine tune the spring preload to your current riding conditions – whether a solo run on the back roads or a fully-loaded two-up freeway tour – and urethane bumpers provide a softer feel if the shock bottoms under load. The beautifully-finished shocks feature black-anodized billet top caps and black progressively-wound springs. Kit includes left and right shock and preload adjustment spanner wrench.

54000066 Stock Height. **$599.95**

DYNA® FOOT CONTROLS
A long stretch to the controls or a "knees-high" cramped riding position puts strain on your body after even a short ride. Repositioning your feet on the controls relieves muscle tension, takes pressure off the tail bone, and reduces rider fatigue. Where your feet contact the controls can often determine how many miles you can put on in a day.

Dyna® models can be equipped with the following foot control configurations:

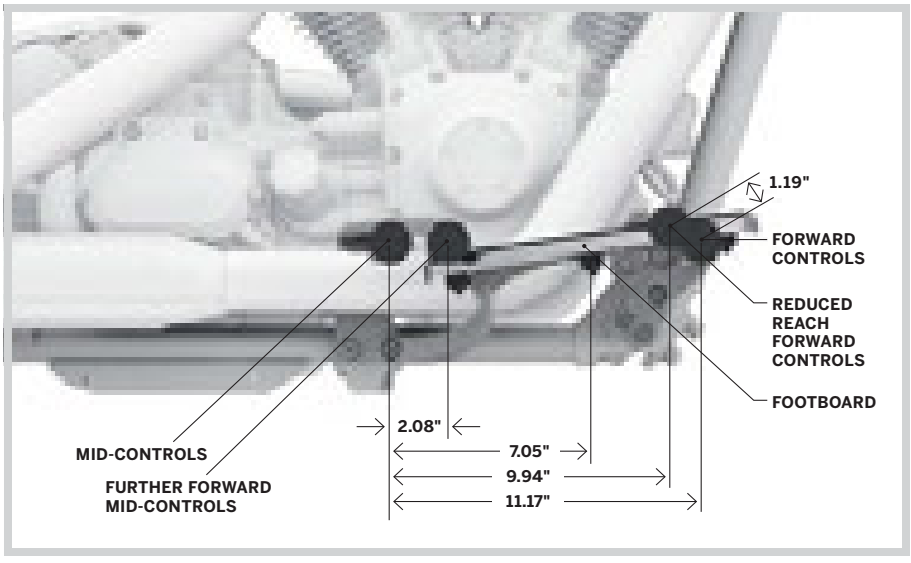

MID-CONTROLS:
Positions the feet below the knee for a sporting riding posture.

FURTHER FORWARD MID-CONTROLS:
Achieves a comfortable foot-down riding position for the taller rider.

REDUCED REACH FORWARD CONTROLS:
Provides a foot-forward boulevard style without straining to reach the controls.

STANDARD FORWARD CONTROLS:
Stretches the legs for a "feet-in the-wind" laid back profiling posture.

FLOORBOARDS:
Supports the entire foot and places the rider in a comfortable upright position.

A. WIND SPLITTER VENTED WINDSHIELD

Reduce helmet buffeting at speed. The Harley-Davidson® Detachables™ Wind Splitter Vented Windshield features an exclusive fingertip-adjustable center vent that reduces turbulence behind the windscreen. When open, the controlled airflow fills the negative pressure area behind the shield and helps to smooth the flow of air over the top of the screen and around the rider. The revised flow reduces helmet bobbing and neck fatigue so you can comfortably spend more time in the saddle. The open vent also provides cooling airflow to the rider at low speeds and in city traffic.

Engineered to provide the riding comfort of a larger windshield, this low-profile screen's contemporary contour sets it apart from the crowd. The shape keeps the windshield below your siteline so you don't look through bugs and road grime and the detachable design means you can ride without the shield when the mood strikes. The shield is formed of hard-coated polycarbonate for strength and scratch resistance and the dark-smoked finish reduces glare. The slim polished stainless steel brackets mount to the Original Equipment rubber isolated docking points for ease of installation and removal.

57400159 **$429.95**

Windshields dimensions: Overall height – 22.4", height from headlamp opening – 16.1", width – 20.3".

B. VENTILATOR H-D® DETACHABLES™ WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection-molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

SOFTAIL® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

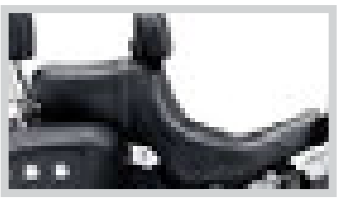

LOW-PROFILE SEATS

These saddles combine radical styling with a "deep-in-the-bike" riding position. Long and lean, Badlander® seats bring you lower to the ground than most other seats.

POSITION SEATS

Designed to place the rider in the best relationship to the controls, Reach® and Tallboy® seats position short and tall riders for a comfortable extension of the arms and legs.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape that holds you in place and provides additional back support.

SUNDOWNER™ SEATS

Designed to maximize long-range comfort, Sundowner Seats feature a deep bucket design that cradles the rider and provides a low slung "in-the-bike" seating position.

REACH® SEATS
Designed to position riders with a shorter inseam closer to the ground, Reach® Seats are shaped to place the rider in a comfortable and confident relationship to the hand and foot controls. The wide seating surface provides loads of support while riding and the narrow tapered nose brings your legs together for an easier reach to the ground at a stop. Reach Seats feature a stepped profile that provides back support and keeps the rider from sliding back during acceleration.

A. REACH SEAT
Designed specifically for riders requiring a close to the bar riding position, this seat positions the rider approximately 1.0" forward and the narrow front profile brings your legs closer together to help you plant your feet firmly on the ground. The seat features a textured vinyl insert and a Bar & Shield logo that shows you are riding in style.

The correct riding position can help a tall rider sit comfortably on the bike and avoid leg cramps and back strain during a long day in the saddle. For riders with a longer inseam, a Tallboy® Seat will put you on the road to fatigue-free riding. Designed to move the rider up and back from the stock seating position, a Tallboy Seat can eliminate the "knees-high" riding position and effectively places the body for a natural arm and leg reach to the controls. Tallboy Seats feature a bucket-shaped design for added support and a wide seating surface to reduce pressure on the tailbone. This Tallboy Seat moves the rider back 2.0" and up 3.0" as compared to the Original Equipment seat. The new position allows additional leg and arm movement for the long-limbed rider and a comfortable seating space for the open road. The Tallboy Seat features a smooth vinyl surface that complements many motorcycle models and a wide pillion for added passenger comfort.

A. BOBBER SOLO SADDLE

How low can you go? This minimalist solo seat takes the stripped-down garage-built look about as far as you can go. The thick distressed black leather cover is bonded directly to the formed metal seat pan and minimizes the foam filler and the extra height it brings. The raw-edge leather pad is joined to the pan with brass rivets, and features matching brass "Milwaukee Since 1903" trim that will develop a rich patina with use. The Bar & Shield logo is embossed into the leather surface as a finishing touch. Easy to install, the bolt-on seat and a model-specific installation kit includes everything you need to get the bobber look. No cutting, welding or fabrication is necessary.

Go it alone in style. Saddlebags hold a change of clothes, a rain suit and the basic travel gear. A Solo Rack and soft bag can store any souvenirs you pick up along the way.

TWO-UP

Take a day's ride on a bike built for two. Saddlebags carry clothes and the essentials, while a Sissy Bar Backrest Pad provides hours of passenger comfort on the open road.

TWO-UP WITH TOUR-PAK® LUGGAGE

The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully-equipped to go wherever you want, for as long as you want.

Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a H-D® Detachables™ sideplate kit and appropriate Docking Hardware to make adding or removing a detachable accessory a simple "slide and click" proposition.

FINDING THE RIGHT FIT

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control, and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

SUSPENSION
Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

ESTABLISH YOUR POSITION

HANDLEBARS
Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

SEATS
Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

FOOT CONTROLS
Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

WHAT'S NEW

2017 FLTRXS Road Glide® Special

Every year we look for more ways to take your Touring motorcycle from factory to custom. Here are just a few of the latest Genuine Motor Parts & Accessories to help you make your dream bike a reality - because every legend is an original.

TURBINE WHEEL

Bring the gleam and add some edge. These cast aluminum "Turbine"-style wheels feature 21 spokes which extend all the way to the edge of the rim, creating the illusion of a larger wheel diameter.

LOW-PROFILE SOLO TOURING SEAT

Combine a low and lean style with a surprising touch of comfort. Start with a shape that distributes your weight across a wide surface area to reduce pressure points. The result is the slammed custom that you crave; with enough comfort and support to let you spend more time in the saddle.

DEFIANCE RIDER FOOTBOARDS

The perfect match to your custom bagger look. The rich black surface is divided by a groove that provides contemporary styling and a whole lot of attitude.

CHIZELED LO HANDLEBAR

With a low 9.00" rise and a flat drag-bar hand position, this compact Z-bar will place the rider into an aggressive, tucked-in riding posture.

SCREAMIN' EAGLE® HEAVY BREATHER AIR CLEANER

This high-flow forward-facing exposed element Air Cleaner Kit is sure to turn heads at the stoplight. Featuring a polished and chrome-plated elbow, this unique air cleaner system offers improved performance and air flow when compared to stock or Screamin' Eagle® High-Flow air cleaners.

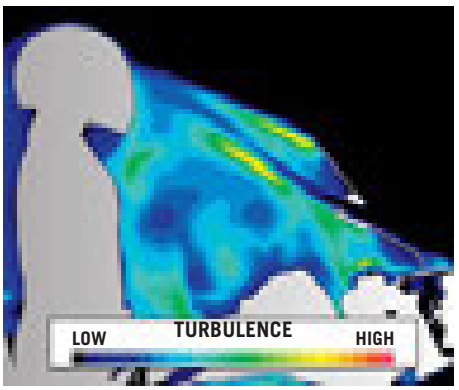

PROFILE CUSTOM MIRRORS

These Profile Custom mirrors provide a sleek profile design to compliment any custom bagger look.

DEFY THE WIND

At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders. Take the pressure off with an easy-to-install detachable windshield. Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.

WIND SPLITTER
Wind Splitter windshields are shaped for effective airflow management and "wow" styling. The sweeping design adds height over a traditional low-profile wind deflector in the center where it counts.

EXTENDED COVERAGE

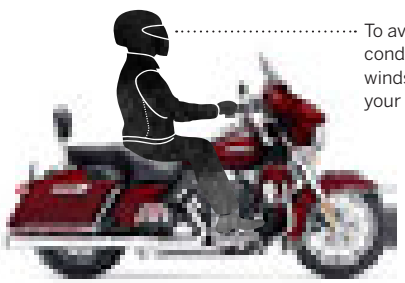

LOW PROFILE
Maximize your view. Made with the shorter rider in mind, this style extends 3 inches below the standard windshield height.

STANDARD HEIGHT
Designed for a rider about 5 foot 10 inches, the Standard Height provides weather protection and an over-the-top view.

TALL
For the taller rider, this style extends 3 inches above standard while preserving both visibility and protection.

SEEING CLEARLY

To avoid looking through bug spots, condensation and road grime, select a windshield that tops out just below your line of sight.

READY FOR TAKE-OFF

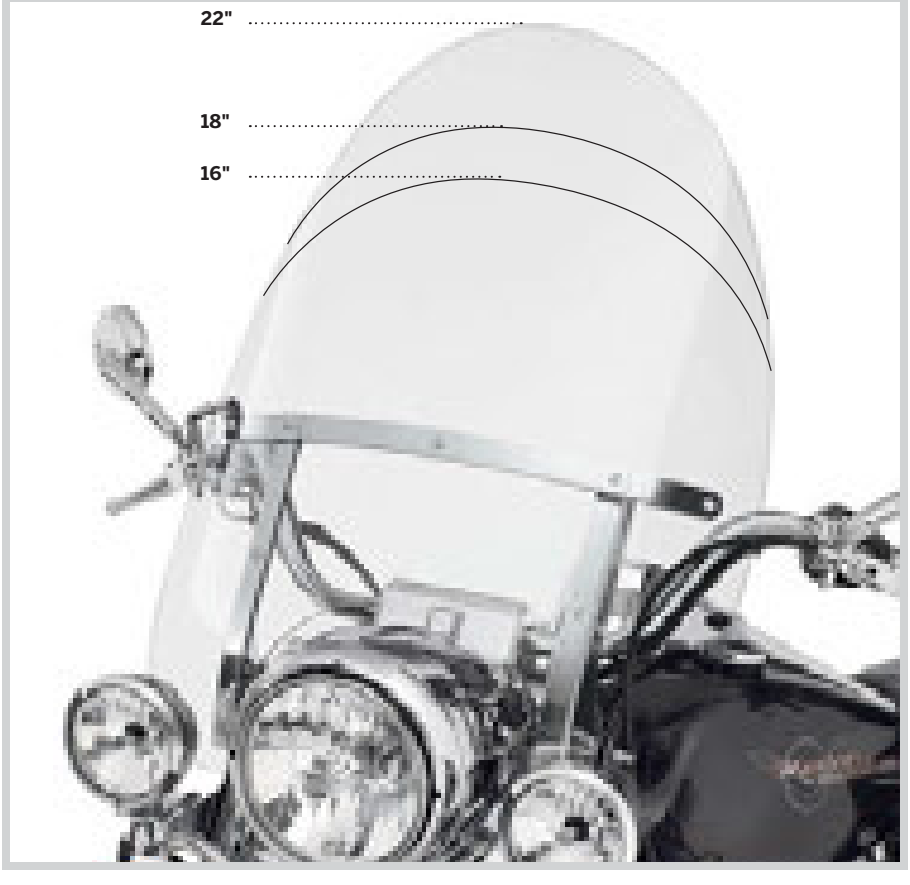

Designed to be installed or removed without tools in seconds, a detachable windshield gives you the freedom to define your ride at the drop of a hat. Ride across the country protected from the elements, then quickly remove the windshield to hit the streets in style.

A. WIND SPLITTER VENTED WINDSHIELD

Reduce helmet buffeting at speed. The Harley-Davidson® Detachables™ Wind Splitter Vented Windshield features an exclusive fingertip-adjustable center vent that reduces turbulence behind the windscreen. When open, the controlled airflow fills the negative pressure area behind the shield and helps to smooth the flow of air over the top of the screen and around the rider. The revised flow reduces helmet bobbing and neck fatigue so you can comfortably spend more time in the saddle. The open vent also provides cooling airflow to the rider at low speeds and in city traffic.

Engineered to provide the riding comfort of a larger windshield, this low-profile screen's contemporary contour sets it apart from the crowd. The shape keeps the windshield below your site line so you don't look through bugs and road grime and the detachable design means you can ride without the shield when the mood strikes. The shield is formed of hard-coated polycarbonate for strength and scratch resistance and the dark-smoked finish reduces glare. The slim polished stainless steel brackets mount to the Original Equipment rubber isolated docking points for ease of installation and removal.

A. WIND SPLITTER WINDSHIELD – BATWING FAIRING
In the world of functional performance, size does matter. After all, it's simple to understand that the larger the windshield area, the greater the amount of wind deflection. The Wind Splitter Windshield is a great look for all Touring models and is shaped for the perfect combination of effective airflow management and "wow" styling. The sweeping design complements the shape of the fairing and the inner dash panel and adds height over a traditional low-profile wind deflector in the center where it counts. The shape decreases wind noise and improves your ability to hear the motorcycle's sound system. The rich smoked finish does not interfere with your forward view and looks great against any paint color. The easy-to-install Wind Splitter features a center-mount Bar & Shield medallion for a distinctive finishing touch.

Fits '14-later Electra Glide®, Street Glide®, Ultra Limited and Tri Glide® models.

Tailor your bike to your size and riding style. For the best compromise between adequate protection from the elements and a clear view of the road ahead, select a windshield that tops out just below eye level. This reduces helmet buffeting while allowing a view unobstructed by dirt, bugs and rain drops. Harley-Davidson® windshields are formed of hard-coated polycarbonate for strength and scratch resistance and are available in a variety of heights and tints to suit your riding needs.

A. WIND SPLITTER WINDSHIELD – ROAD GLIDE®
In the world of functional performance, size does matter. After all, it's simple to understand that the larger the windshield area, the greater the amount of wind deflection. The Wind Splitter Windshield is a great look for all Touring models and is shaped for the perfect combination of effective air flow management and "wow" styling. The sweeping design complements the shape of the fairing and the inner dash panel and adds height over a traditional low-profile wind deflector in the center where it counts. The shape decreases wind noise and improves your ability to hear the motorcycle's sound system. The rich smoked finish does not interfere with your forward view and looks great against any paint color. The easy-to-install Wind Splitter features a center-mount Bar & Shield medallion for a distinctive finishing touch.

Fits '15-later Road Glide® models.

A. COOLFLOW™ FAN

Keep your cool on a sweltering summer day. Engineered to maximize rider and passenger comfort in high temperature situations, the CoolFlow™ Fan is the perfect addition if your bike is subjected to parade duty, rush hour traffic, or extreme temperature environments. Unlike traditional fan kits that try to cool the engine by blowing air across the cylinders and often onto your legs, the CoolFlow Fan Kit keeps the riders comfortable by pulling air away from the rear cylinder and exhaust pipe, and directing it toward the ground. The fan suction generates a low pressure region near the riders to balance the natural "up and out" convection air flow in the area behind the engine. The wind-tunnel tested fan is tucked away above the transmission, and when combined with mid-frame air deflectors, significantly drops the temperature the seated rider experiences.

The CoolFlow Fan features switched On/Off/Auto operation. In the "ON" mode, the fan is active at low speeds, and will turn off when the bike reaches 40mph. As speed drops, the fan turns back on at 35mph. This logic program prevents the fan from cycling on and off during low speed changes. In the "AUTO" setting, the fan operates based on a combination of speed parameters and specific engine and ambient temperatures. Built to withstand the harsh motorcycle environment, the all-weather CoolFlow Fan is 100% waterproof and includes everything you need for installation. The plug-and-play design is integrated with the vehicle electronics, so "On/Off/Auto" fan operation is indicated in the odometer screen. Your dealer will enable this function in the Electronic Control Module (ECM) and you're ready to roll.

ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

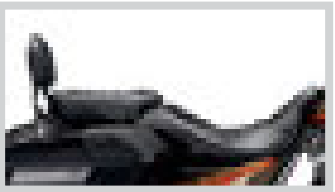

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

TOURING SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

LOW-PROFILE SEATS

These saddles combine radical styling with a "deep-in-the-bike" riding position. Long and lean, Badlander® and low-slung Solo Seats bring you closer to the ground than most other seats.

POSITION SEATS

Designed to place the rider in the best relationship to the controls, Reach® and Tallboy® seats position short and tall riders for a comfortable extension of the arms and legs.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape holds you in place and provides additional back support.

SUSPENSION SEATS

Harley® Hammock and Road Zeppelin® seats provide isolation from road shock with internal fabric or air bladder suspension systems that prevent "bottoming out" to increase rider comfort and endurance.

REACH® SEATS
Designed to position riders with a shorter inseam closer to the ground, Reach® Seats are shaped to place the rider in a comfortable and confident relationship to the hand and foot controls. The wide seating surface provides loads of support while riding and the narrow tapered nose brings your legs together for an easier reach to the ground at a stop. Reach Seats feature a stepped profile that provides back support and keeps the rider from sliding back during acceleration.

A. SUPER REACH SEAT
Get a little bit closer. Super Reach forward position seats are designed to move riders with a shorter inseam even closer to the controls and to bring the legs about 1.0" closer together so that your feet rest firmly on the pavement. The scooped bucket-shape saddle is enhanced with added back support padding to move the rider lower and forward.* The combination positions the rider closer to the hand and foot controls to offer both comfort and confidence. Seat can be equipped with optional rider backrest for added support and comfort.

*Measurements based on Original Equipment Electra Glide® seat:
'09 models – 2.0" lower, 2.5" forward

A. SUPER REACH SEAT

B. REACH SOLO SEAT
From the custom metal Bar & Shield medallion to the sleek fast-back design, this seat is shaped to deliver the ergonomic position that a shorter rider needs. Sculpted and molded to ease the reach to the ground, this Reach Solo seat places the rider 3/8" lower and 1-1/4" forward when compared to the stock FLHX seat*. The narrow nose and the low overall height provides the rider with added confidence and control while the bike is at a stop or during parking maneuvers, while the generous seating width adds support for the long haul. And the seat's upturned tail moves you closer to the controls without confining you to one position. For maximum comfort and support, this seat is recommended for smaller framed riders between 5'-2" and 5'-8" tall.

*Measurement as compared to other seating options:

TALLBOY® SEATS
The correct riding position can help a tall rider sit comfortably on the bike and avoid leg cramps and back strain during a long day in the saddle. For riders with a longer inseam, a Tallboy® Seat will put you on the road to fatigue-free riding. Designed to move the rider up and back from the stock seating position, a Tallboy Seat can eliminate the "knees-high" riding position and effectively places the body for a natural arm and leg reach to the controls. Tallboy Seats feature a bucket-shaped design for added support and a wide seating surface to reduce pressure on the tailbone.

A. TALLBOY SEAT – '14-LATER MODELS
This Tallboy Seat moves the rider back 1.5"* to provide much-needed arm and leg room for the long-limbed rider. The seat is sculpted to provide superior support and comfort, with a slight bucket shape to provide room to vary your riding position fore and aft. The seat's level seating surface does not pitch the rider forward, and the overall ride height is similar to stock Electra Glide® and Road Glide® Ultra seating. Passenger comfort will be maximized with the Tour-Pak® Luggage mounted in the rear most position. Tallboy seats can be equipped with an optional rider backrest (except Adjustable Style) for additional touring comfort.

*Measurements based on Original Equipment Electra Glide seat.

ROAD ZEPPELIN® AIR ADJUSTABLE SEATS
The open road. That's where we developed and tested the revolutionary comfort of the Road Zeppelin® Seat. This remarkable seat removes pressure points and "hot spots" by adjusting the amount of air contained in each bladder within the seat. Easy-to-reach rocker switches on the side of the seat control the built-in compressor, adding and bleeding off air with the quick push of a button to help relieve stress from the lower back, tailbone or lower extremities. On a long run, occasionally inflating and deflating the air bladders reduces the "numb butt" effect by improving the blood flow to the extremities. So grab a seat. And enjoy the ride.

FINDING THE RIGHT FIT

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control, and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

SUSPENSION

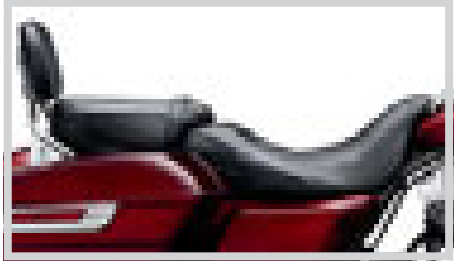

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

ESTABLISH YOUR POSITION

HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

A. PREMIUM RIDE HAND-ADJUSTABLE TOURING SHOCKS*

Experience the ultimate in superior ride quality with these Premium Touring Shocks. These shocks utilize a single tube, nitrogen charged emulsion design. Larger chambers (40mm diameter pistons and 14mm rods) allow these shocks to react more quickly to impacts. This keeps the tires tracking while minimizing harshness transmitted through the frame. G. CHOPPED ENGINE GUARD*

Create a sleek, slammed look on your custom bagger with the Chopped Engine Guard. This guard offers a slim, low-profile design that retains function while delivering a unique styling twist. The upper mounts connect midway up the downtube, 11" inches lower than the stock guard. The minimalistic look reduces the visual mass of the bike, while the mounting point lowers the bike's visual center of gravity. The 1.25" Engine Guard features a slightly forward sweep that provides plenty of room around the brake and shift levers. Easy to install.

Fits '09-later Touring models (except Road Glide® and models equipped with fairing lowers).

49000105	Chrome.	**$289.95**
49000114	Gloss Black.	**$289.95**

Fits '15-later Road Glide models without fairing lowers. Kit includes replacement fairing mount brackets.

Fits '09-later Touring models (except Road Glide®). Does not fit models equipped with fairing lowers.

Before the tough black powder coat finish is applied, these engine guards get an extra layer of protection from an E-Coat dip. So go on and install Engine Guard Mount Footpegs because this finish will go the distance.

49050-09A **$214.95**

The robust chrome Center Stand attaches directly to the frame and does not reduce the lean angle. Designed to work with all Original Equipment suspension configurations and with Profile® suspension lowering kits, the adjustable feet can be set to lift the rear tire clear of the pavement, or to keep the rear tire on the ground for reduced lifting effort. The lifting lever is inconspicuously tucked away, and fits with all Harley-Davidson® Original Equipment and accessory footboards. HARLEY-DAVIDSON®

SCREAMIN' EAGLE®

It's all about performance, look and feel with this powerful lineup of enhancing air intake, engine kits, and exhaust components. If more is what you want, more is what you'll get.

GENUINE MOTOR PARTS & ACCESSORIES

PRINCIPLES OF PERFORMANCE

Nobody says “no” to more torque and horsepower. Since the beginning, Harley-Davidson® motorcycle riders have felt the pull to amp up their powertrain performance. Greater acceleration, increased passing power, or just more of that rip roaring, raw Harley-Davidson exhaust sound make customizing your bike more than a little addicting.

SETTING THE STAGE

Building a performance engine can be as intimidating as swinging your leg over for the first time. But you don’t have to start from scratch. A factory-engineered Screamin’ Eagle® Stage upgrade is the place to start with complete, street compliant performance configurations for the increased torque and horsepower you are looking for. Zero guesswork. Zero trial-and-error testing. We engineer it that way. By separating the process into stages, you have the choice to see how each upgrade affects your bike and your ride. Get a bump in power now. Add more over time. Or, hell, just go all in. No one knows the right feel for your bike better than you.

Screamin’ Eagle Stage Kits are offered in a variety of options designated as Stage I, II, III, IV. The higher-numbered kits provide the greatest increase in performance. Stage I is the starting point, with the option to upgrade to a higher-numbered stage kit in the future.

PATH TO PERFORMANCE

STAGE I

I WANT SIMPLE BOLT ON PERFORMANCE UPGRADES THAT ENHANCE THE PERFORMANCE, LOOK AND SOUND OF MY MOTORCYCLE.

WANT MORE POWER?

STAGE II TORQUE KIT

I WANT INSTANT PASSING POWER AT CRUISING AND HIGHWAY SPEEDS.

STAGE II POWER KIT

I WANT TO FEEL THE POWER BUILD AND THEN PULL ALL THE WAY TO THE REDLINE.

STAGE III KIT

BIGGER IS BETTER. I WANT TO FEEL INSTANT POWER THAT LASTS THROUGHOUT THE ENTIRE RPM RANGE.

STAGE IV KIT

I RIDE HARD AND WANT THE ABSOLUTE BEST PERFORMANCE UPGRADE AVAILABLE. TRY TO KEEP UP...I DARE YOU!

Screamin' Eagle PERFORMANCE

*Handlebar height is regulated in many locations. Check local laws before installation.

STAGE I

FEED THE BEAST

Moving more air through your engine = more horsepower and torque. Pretty damn simple. A Stage I upgrade includes high-flow air cleaners, exhaust mufflers and the proper electronic control module (ECM) tuning, using the Pro Street Tuner. Stage I is required for other Stage upgrades, and Tuning is required for each Stage upgrade.

Upgrade can be installed without engine disassembly. ECM tuning required.

STAGE III

GO BIG

There's no replacement for displacement, and that means more cubic inches. Stage III upgrades add size to your engine and increases compression for a bigger bang. With the proper cam profile and free-flowing intake and exhaust, a big bore motor can be tuned to deliver the power to ride any way you like or the power to ride two up, and feel like you're solo.

Upgrade requires removing the engine's top end and swapping the cam. The engine remains in the chassis and no machining or custom fitting is required. Special tools and ECM tuning are required.

Screamin' Eagle PERFORMANCE

STAGE II

PERSONALIZED POWER

This is how you can make your engine, your engine. Performance when you want it. Your ideal idling sound. Your everything. By updating the cam and valve train, you control the timing of all major engine events. Every cam has unique characteristics so your engine can be tuned to focus on how you want the performance to feel.

TORQUE KIT:
Crisp throttle response and acceleration you can feel at lower RPMs.

POWER KIT:
Adrenalin-pumping acceleration for those who like to downshift and ride in the higher RPMs.

Stage II upgrades can be added on to your Stage I upgrade by simply selecting the cam kit that best fits your (riding) style.

Upgrade requires minor engine disassembly to replace the cam. Adjustable pushrods allow for cam installation without removing the rocker box. ECM tuning required.

STAGE IV

FINISHING TOUCH

Now that you've got the volume, use it the right way. By adding high-flowing ported and matched upper-end components to the bigger engine you can make sure you're moving as much air and fuel as the engine can take. This stage adds more horsepower to the already impressive Stage III upgrade.

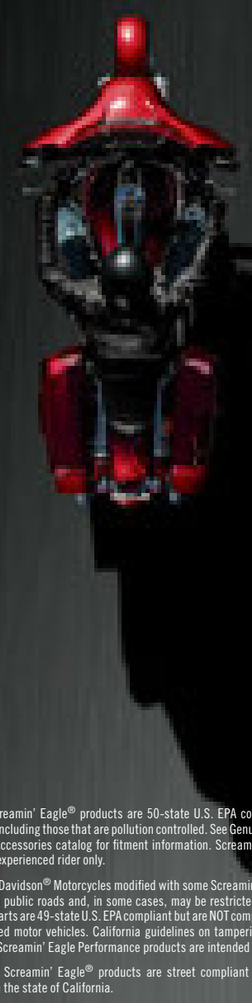

Maximize your horsepower – not the labor. Similar to Stage III, upgrade requires removing the engine's top end and swapping the cam. The engine remains in the chassis and no machining or custom fitting is required. Special tools and ECM tuning are required.

CRATE ENGINES

FULL POWER

Harley-Davidson knows no performance enthusiast is ever satisfied. You just need more. That's why we offer fully assembled factory-built Screamin' Eagle® performance engines – ready to go, with no internal engine modifications needed. Genuine product packed with the power and confidence to deliver all of the performance you need.

Although internal engine modifications are not required, full removal and reinstallation of the engine and tuning are required.

PERFORMANCE TUNING

UNIVERSAL TO ALL STAGE UPGRADES

All Stage Kit upgrades require engine control module (ECM) recalibration. The Pro Street Tuner provides worry-free, computer-based adjustments that will account for the variations your bike needs – and keeps your warranty intact as you upgrade your motorcycle's performance.

Tuner software is available via web download and includes all of the starting calibrations for current, compliant Stage Kit upgrades.

More than just a flash tool, the Pro Street Tuner is a very capable tuning solution that customizes fuel delivery, spark advance and throttle progressivity to address the variances between your bike and your riding preference.

Smart Tune allows both owners and technicians to collect engine sensor data by simply running the vehicle through a range of RPM and throttle positions, which is a great alternative to some of the more complicated dyno tuning. All of this data is collected and then leveraged at the shop to create your starting calibration file. Users can make manual adjustments, as well.

AN OVERVIEW OF WARRANTY & CAUTION: Harley-Davidson has the engineering expertise, sophisticated dyno lab and complete testing facilities to provide enthusiasts with a line of performance products designed to produce good, solid, reliable horsepower and torque. Engine-related performance parts are intended for the experienced rider only.

WARRANTY: Installation of Screamin' Eagle® products and similar off-road or competition products from other manufacturers, except some street-compliant offerings installed by authorized Harley® dealers, may void your H-D® limited vehicle warranty. Installation of a California performance kit on a 49-state model or motorcycle or 49-state performance kit onto a California model motorcycle will void the manufacturer's warranty, as it will not result in a street-compliant configuration.

CAUTION: Harley-Davidson® motorcycles modified with some Screamin' Eagle® high-performance engine parts must not be used on public roads and in some cases may be restricted to closed-course competition.

Street-legal and/or street compliant statements refer to product meeting 50-state emissions and noise standards in the United States.

DYNAMOMETER (DYNO) PERFORMANCE TESTING: Declared performance values in this catalog represent SAE J-1349 transient peak power output. Dynamometer settings, motorcycle condition, variation, climate and other factors can affect performance output and results can vary from the performance values declared by Harley-Davidson.

Not all products are available in all countries – please consult your dealer for details.

CAUTION ICONS:

STOP HAND: Harley-Davidson® Motorcycles modified with some Screamin' Eagle® Performance products must not be used on public roads and, in some cases, may be restricted to closed-course competition. These performance parts are 49-state U.S. EPA compliant but are NOT compliant for sale or use in California on pollution-controlled motor vehicles. California guidelines on tampering can also lead to substantial fines and penalties. Screamin' Eagle Performance products are intended for the experienced rider only.

CALIFORNIA: These Screamin' Eagle® products are street compliant for sale and use on pollution-controlled vehicles in the state of California.

PERFORMANCE TUNING

You have designed your "perfect" performance V-Twin, selected a free-flowing air cleaner, added a great sounding exhaust, and installed engine components to match your performance goals. Now it's time to make it all work together. The Screamin' Eagle® Pro Street Tuner is the brains behind the brawn. It provides a fully capable tuning solution, adjusting fuel and spark requirements to match the airflow changes dictated by performance cam, head, intake and exhaust system upgrades. Optimized to work with Screamin' Eagle components, the base calibrations are dialed in by the same engineers that built your performance parts. The Pro Street Tuner knows just how to "talk to the bike", working seamlessly with the Engine Control Module (ECM) for flawless performance you can count on.

Screamin' Eagle Pro Street Tuner

SCREAMIN' EAGLE® PRO STREET TUNER

The Screamin' Eagle Pro Street Performance Tuner is designed to simplify management of engine operating parameters as performance modifications are made. Once installed, the kit will allow you to adjust key parameters or simply upload the latest Engine Control Module (ECM) calibrations to match your bike's state-of-tune. Start with a high-flow air cleaner and Street Performance mufflers and upload the calibration that provides the best performance mix. Add additional Stage Upgrades later, and you simply upload the proper ECM calibration to match the model and hardware. Plus, you have free online access to the latest factory calibrations.

Ideal for real-world street performance applications, the Pro Street Tuner provides the adjustability to account for bike-to-bike variation and for changes to cams, heads, intake and exhaust while maintaining closed-loop fuel control for fuel economy in the part-throttle operating range. Unlike other aftermarket tuners, The Screamin' Eagle Pro Street Tuner actually talks directly to your motorcycle's ECM and re-programs the motorcycle's operating system. It isn't a piggyback system that tries to fool the ECM into adding more fuel or changing the ignition timing. The Pro Street Tuner plugs into the bike's data port, so no splicing or under-seat hardware is required.

After you upload the proper ECM calibration, dial it in with the Smart Tune function. New for 2017, the guided Smart Tune process walks you through the process to; find the right calibration for your build, set the tuner to a data collection mode and then allows you to incorporate the data after the ride with just a few clicks. The ECM calibration is then custom fit for your bike. The module will store up to 15 minutes of run-time data information that can be downloaded to your PC, allowing the rider or technician to view and evaluate the bike's air/fuel ratio, O2 sensor readings, engine speed and temperature, RPM and vehicle speed, throttle position, spark advance and many more performance characteristics. The VCI will also record and display service codes for troubleshooting and diagnostics. The kit includes the Vehicle Communications Interface (VCI) module and unlimited access to the latest software updates and calibrations available from Screamin' Eagle. Tuner Cable kit sold separately.

The Pro Street Tuner software includes impressive features:

- New for 2017, the Screamin' Eagle Pro Tuner features a guided Smart Tune process to enable quick navigation through the software, whether you are new to tuning or an experienced user.
- Smart Tune Live – a dynamic and visual method to track and capture engine data simply by running the vehicle through a range of RPM and throttle positions. This feature reduces the time to modify existing VE (Volumetric Efficiency) tables which are then analyzed and tuned. Smart Tune Live works on models with factory-installed O2 sensors only.
- Adjustability to Spark Advance, Throttle progressivity, and Volumetric Efficiency to custom tune the performance combination.
- 50-State U.S. EPA compliant.

The Pro Street Tuner permits tunability to optimize performance and drivability without compromising fuel efficiency, emission levels, engine durability, or 50-State U.S. EPA compliance. And unlike other race tuners or engine controllers, the Screamin' Eagle Pro Street Tuner does not impact your Harley-Davidson factory warranty coverage.

STAGE I

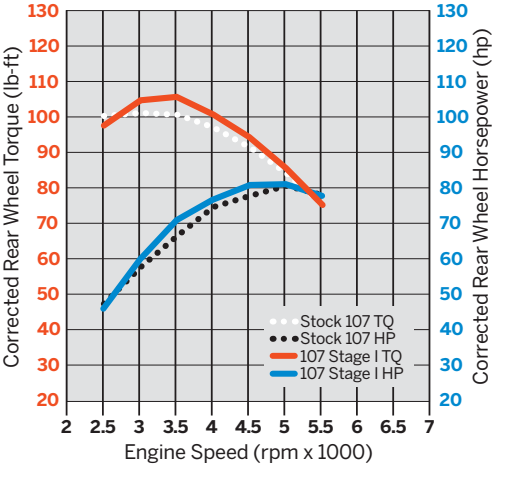

INTAKE + EXHAUST + TUNING

The easiest and most cost effective step to improve your motorcycle's performance is to increase the air flow into and out of the engine. A high-flow air cleaner and system-matched slip-on muffles provide horsepower and torque improvements you can feel throughout the RPM range, and serve as the core components for all performance upgrades. ECM calibration is required to tune the fuel flow and timing required to accommodate the improved air flow.

Stage I upgrade can be installed without engine disassembly. No special tools are required. Requires ECM tuning.

*107 Stage I with Heavy Breather A/C & Street Cannon Mufflers

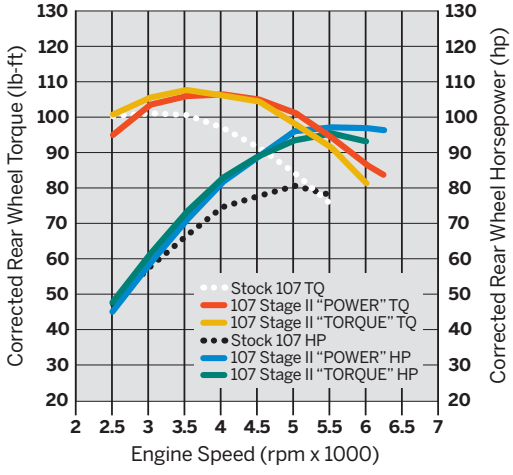

Street legal and/or street compliant statements refer to product meeting 50-State emissions and noise standards in the United States.

STAGE II

STAGE I + CAM UPGRADE

Adding a performance cam to a Stage I equipped bike is the next step to improved performance. Cam choices allow you to tailor the engine's performance to your specific needs. A "torque" cam offers on-demand throttle response from low- to mid-RPM at cruising speed. A "power" cam targets high-rpm, wide-open throttle response that keeps pulling right up to redline. ECM calibration tuning is required to accommodate the increased valve timing, and performance valve springs may be required for high-lift cams.

Milwaukee-Eight™ 107 Stock vs. 107 Stage II*

*107 Stage II "POWER" with Ventilator A/C & Street Cannon Mufflers
*107 Stage II "TORQUE" with Heavy Breather A/C & Street Cannon Mufflers

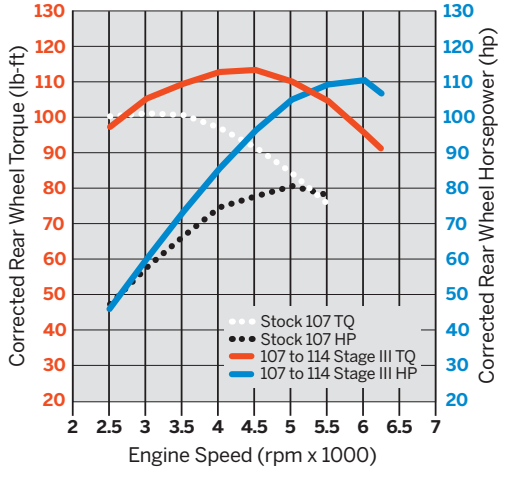

Stage II upgrade requires minor engine disassembly to replace the cam. Adjustable pushrods allow cam installation without removing the rocker box. Special tools and ECM tuning are required.

STAGE III

STAGE II + BIG BORE CYLINDERS & PISTONS

The next step on the performance journey is to build a "bigger" engine. An increase in engine displacement allows the engine to swallow more air and fuel, a higher compression piston squeezes the air/fuel into a more volatile mixture, and when combined, generates more power when ignited. A displacement and compression increase provides torque increases throughout the entire RPM range with a 15-25% improvement in the mid-range power. ECM calibration tuning is required to adjust fuel flow and timing to accommodate the increased displacement.

Milwaukee-Eight 107 Stock vs. 107 to 114 Stage III*

* 107 to 114 Stage III with High Flow A/C & Street Cannon Mufflers

Stage III "bolt-on" upgrade requires removal of the engine's top-end and opening the cam chest. Engine remains in the chassis and no machining is required. Special tools and ECM tuning are required.

TWIN CAM POWERTRAIN

Screamin' Eagle® Stage upgrades offer complete street-compliant performance configurations engineered to generate specific torque and horsepower gains. Eliminating all the guesswork and trial-and-error testing normally associated with engine modifications, Stage upgrades include everything you need to enhance your bike's performance. You can start with key components that give you a bump in power right now, add components as time and budget permits, or you can go for it all at once.

STAGE I

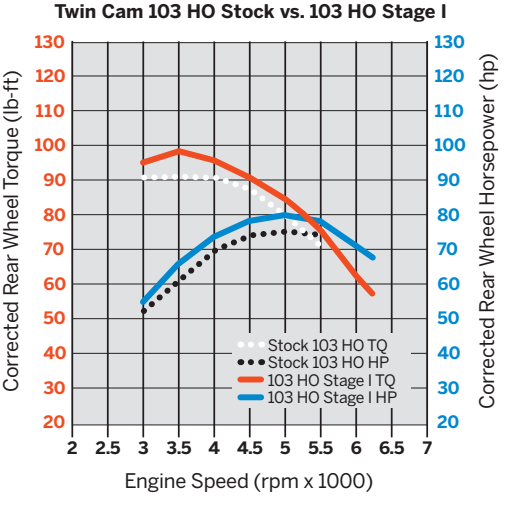

INTAKE + EXHAUST + TUNING

The easiest and most cost effective step to improve your motorcycle's performance is to increase the air flow into and out of the engine. A high-flow air cleaner and system-matched slip-on muffles provide horsepower and torque improvements you can feel throughout the RPM range, and serve as the core components for all performance upgrades. ECM calibration is required to tune the fuel flow and timing required to accommodate the improved air flow.

Stage I upgrade can be installed without engine disassembly. No special tools are required. Requires ECM tuning.

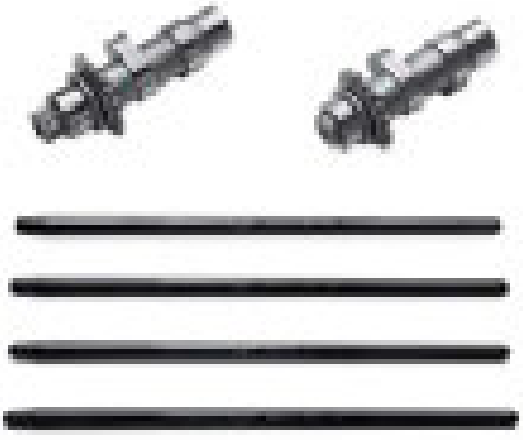

STAGE II

STAGE I + CAM UPGRADE

Adding performance cams to a Stage I equipped bike is the next step to improved performance. Cam choices allow you to tailor the engine's performance to your specific needs. A "torque" cam offers on-demand throttle response from low- to mid-RPM at cruising speed. A "power" cam targets high-rpm, wide-open throttle response that keeps pulling right up to redline. ECM calibration tuning is required to accommodate the increased valve timing, and performance valve springs may be required for high-lift cams.

Stage II upgrade requires minor engine disassembly to replace the cam. Adjustable pushrods allow cam installation without removing the rocker box. Special tools and ECM tuning are required.

STAGE III

STAGE II + BIG BORE CYLINDERS & PISTONS

The next step on the performance journey is to build a "bigger" engine. An increase in engine displacement allows the engine to swallow more air and fuel, a higher compression piston squeezes the air/fuel into a more volatile mixture, and when combined, generates more power when ignited. A displacement and compression increase provides torque increases throughout the entire RPM range with a 15-25% improvement in the mid-range power. ECM calibration tuning is required to adjust fuel flow and timing to accommodate the increased displacement.

Stage III "bolt-on" upgrade requires removal of the engine's top-end and opening the cam chest. Engine remains in the chassis and no machining is required. Special tools and ECM tuning are required.

STAGE IV

STAGE III + CYLINDER HEADS & THROTTLE BODY

To maximize the impact of the increased displacement gained with Stage III updates, the addition of free-flowing ported cylinder heads and a big bore throttle body top off the performance build. Designed to satisfy the high RPM, throttle twisting rider, the Stage IV update delivers 20-30% increase in power that keeps pulling right up to the redline, without sacrificing mid-range torque. ECM calibration tuning is required to add more fuel, and a higher-lift cam may be required to deliver maximum power.

Stage IV "bolt-on" upgrade requires removal of the engine's top-end and opening the cam chest. Engine remains in the chassis and no machining is required. Special tools and ECM tuning are required.

The Screamin' Eagle® High-Flow Exhaust system provides bolt-on performance by reducing the catalyst restrictions and improving exhaust flow. This exhaust system is optimized for use on engines producing 80+ horsepower and works great with Screamin' Eagle Stage kits 1 through 4. The kit replaces the stock head pipe and mufflers with large diameter, free-flowing head pipes and matching mufflers. The muffler inlet diameter has been increased to 2.25" to enhance exhaust gas scavenging and the catalysts have been relocated to the mufflers to enhance flow. The proof is in the horsepower and torque numbers. Dial the system to your motorcycle by using the Screamin' Eagle Pro Street Tuner to tune your ECM specifically to match your performance upgrades.

The large 4" diameter Street Cannon mufflers are tuned to provide a deep bass exhaust note and a healthy rumble at idle, and that famous Harley sound throughout the RPM range. 50-State U.S. EPA compliant.

TWIN CAM STAGE II UPGRADE

Camshafts are a fundamental ingredient in the performance recipe, because they control the timing and duration of all major engine events. They are the primary means by which you can tune your engine's horsepower and torque output. Every cam has unique lift and overlap performance characteristics, which means you need to select cams based on exactly the kind of power you're looking for.

A. SCREAMIN EAGLE® TWIN CAM PERFORMANCE CAMS

Kits include front and rear cams. Splined rear cam is included for exceptional load handling capability. Gaskets and bearings not included. Cam Installation Kit P/N 17045-99C (sold separately) includes all required gaskets, bearings and seals for proper installation. Dealer installation is recommended and special tools are required for proper installation.

SE-255 CAM KIT

The ultimate in torque cams, this cam offers substantial increase in low end torque for engines up to 110 cubic inches with compression ratios up to 10 to 1. The low end torque increases are great for heavy bikes or for the person who routinely shifts below 4500 RPM and wants the power available to pass without downshifting. The cam still makes peak power above 5000 RPM so people with lighter bikes will enjoy the torque increases without feeling like the bike runs out of air at higher engine speeds. 50-State U.S. EPA compliant.

25638-07 **$329.95**

For use on '09-'13 Dyna®, Softail®, and '09-'13 Touring and Trike models with 103CI and 110CI engines. All EFI models require ECM calibration for proper installation. '17-later models require recalibration with Screamin' Eagle® Pro Street Tuner (sold separately). Labor cost not included. See Dealer for details.

SE-259E CAM KIT

Developed specifically for big displacement Twin Cam engines, this cam has a modern lobe design that allows for higher valve lifts for a given duration. A high-lift version of the SE-211 camshaft, this cam works great with 103 cubic inch and larger engines with free-flowing intake and exhaust. It can be used with stock heads (updated with race springs) and high-compression pistons for even more torque than a SE-211 cam or can be coupled with any of the performance heads to realize the full power potential. 50-State U.S. EPA compliant.

25482-10 **$329.95**

For use on '11-'15 103CI and 110CI Touring and Trike models. Installation requires separate purchase of Performance Valve Spring Kit P/N 18013-03A. All EFI models require ECM calibration for proper installation. '17-later models require recalibration with Screamin' Eagle Pro Street Tuner (sold separately). Labor cost not included. See Dealer for details.

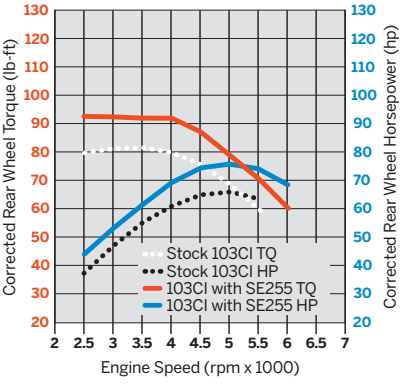

SE-585 CAM KIT

This cam is a great match for riders of heavy Touring bikes looking for big torque at the low end. Just a quick downshift to fourth gear results in an effortless pass of that slow moving tractor-trailer ahead of you. This cam provides an early hit of torque at the low end of the RPM spectrum. A unique combination of lift, cam lobe duration and an enhanced cam profile ramp provides a performance boost you can feel. The cam's QRD (Quiet Ramp Design) delivers high torque throughout the RPM range while reducing valve train noise. 50-State U.S. EPA compliant.

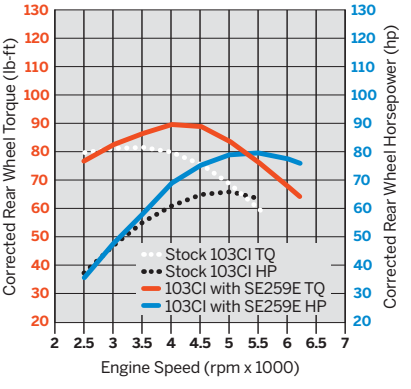

25400117 **$329.95**

For use on '14-'16 Touring models with the use of a 58mm Throttle Body. Also fits '14-'16 CVO™ Touring models with or without the use of a 58mm Throttle Body. Does not fit Trike models. Installation requires separate purchase of Performance Valve Spring Kit P/N 18013-03A. All EFI models require ECM calibration for proper installation. '17-later models require recalibration with Screamin' Eagle Pro Street Tuner (sold separately). Labor cost not included. See Dealer for details.

Aluminum is specified at 6061 billet plate, heat-treated to T6 specifications with a surface-hardened anodized finish to provide superior strength, rigidity and durability. CNC-precision machining ensures precise dimensions and constant material thickness across the plate, enabling perfect alignment of cams and chains. Cam bushings are made from 660 bronze materials to provide enhanced wear resistance and to stand up to increased loads from the high lift cams common in large displacement motors. The improved Screamin' Eagle® high-flow oil pump provides higher pressure when the oil is hot to keep pressure drops to a minimum and increases the oil supply by 16% and the scavenging by 29% over the '06-later Original Equipment oil pump.

25282-11 **$429.95**

Fits '06-later Dyna® and '07-later Softail®, and '07-'16 Touring and Trike models. Installation requires separate purchase of Cam Service Kit P/N 17045-99D and Drive Gear Retention Kit P/N 25566-06.

B. SCREAMIN' EAGLE HYDRAULIC CAM CHAIN TENSIONER AND HIGH-FLOW OIL PUMP UPGRADE KIT

This kit updates the cam chain tensioner of your Twin Cam 88® engine to the latest design, as featured on the Twin Cam 96™ engine. The billet cam support plate has been designed to allow the installation of the Twin Cam 96 hydraulic cam chain tensioner to Twin Cam 88-equipped models. These Hydraulic Cam Chain Tensioners will significantly outlast the spring loaded tensioners and are an ideal addition to an engine modified for improved performance. In addition, '02-'06 models utilize a Twin Cam 96 single row front roller chain and sprocket (included in kit). '99-'01 models use Original Equipment front silent chain and sprocket to retain the cam position sensor function. The kit includes an improved Screamin' Eagle High-Flow Oil Pump that provides increased oil pressure at high-operating temperatures. This kit increases the oil supply by 23% and scavenging by 50% when compared to the '99-'05 Original Equipment oil pump and reduces operating temperature of bearings to improve bearing life.

25284-11 **$499.95**

Fits '99-'05 Dyna, '00-'06 Softail and '99-'06 Touring models. Installation requires separate purchase of Spacer Kit P/N 25285-08, Cam Service Kit P/N 17045-99D and Drive Gear Retention Kit P/N 25566-06.

C. SCREAMIN' EAGLE HIGH-PERFORMANCE INNER CAM BEARINGS

High-performance Inner Cam Bearings are a smart upgrade when installing high-lift cams in a race bike. These bearings provide increased load capacity and extend the engine life in extreme racing conditions. Kit includes two bearings required to complete one Twin Cam engine.

BOLT-ON TWIN-CAM 110 BIG BORE STAGE KITS

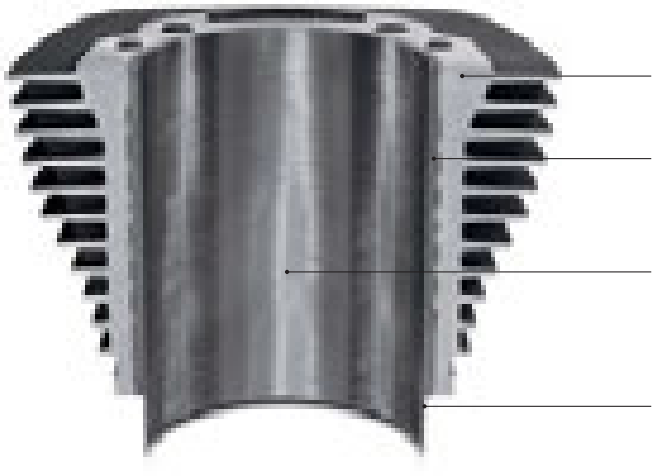

HIGH-STRENGTH CYLINDER LINERS ARE MACHINED TO SLIP INTO THE STOCK CASE OPENING

FEATURES

BOLT-ON BIG BORE CYLINDERS

In the past, the only way to increase the bore of your 103 or 110 cubic inch Twin Cam V-Twin motor was to tear down the motor and re-bore the engine cases to fit larger bore cylinder spigots. It was a labor-intensive – and expensive – process. The Screamin' Eagle team has engineered a 4" Big Bore Cylinder and Piston package that increase the internal bore from 3-7/8" to 4", without increasing the outside diameter of the cylinder spigot. The cylinder slips into the existing case bore without modification.

SPORTSTER® POWERTRAIN

Screamin' Eagle® Stage upgrades offer complete street-compliant performance configurations engineered to generate specific torque and horsepower gains. Eliminating all the guesswork and trial-and-error testing normally associated with engine modifications, Stage upgrades include everything you need to enhance your bike's performance. You can start with key components that give you a bump in power right now, add components as time and budget permits, or you can go for it all at once.

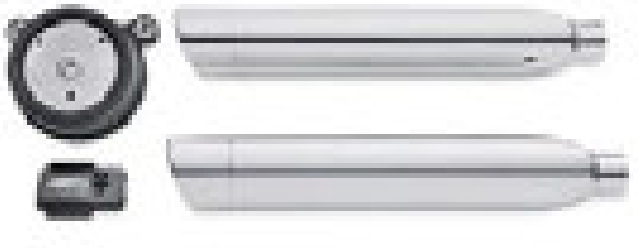

STAGE I

INTAKE + EXHAUST + TUNING

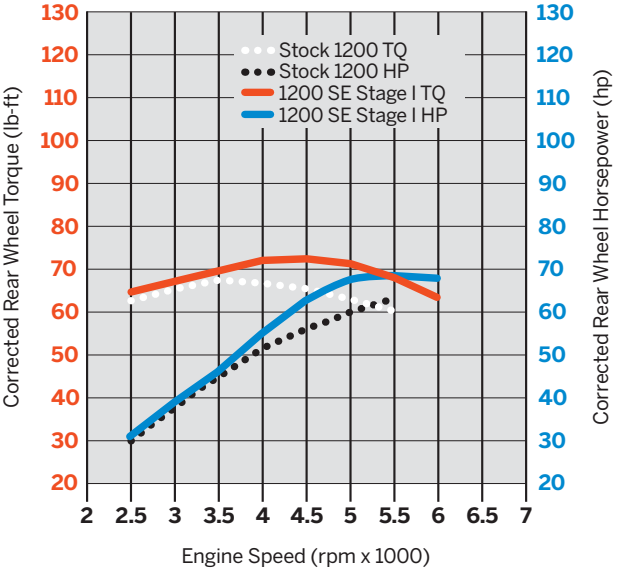

The easiest and most cost effective step to improve your motorcycle's performance is to increase the air flow into and out of the engine. A high-flow air cleaner and system-matched slip-on mufflers provide horsepower and torque improvements you can feel throughout the RPM range, and serve as the core components for all performance upgrades. ECM calibration is required to tune the fuel flow and timing required to accommodate the improved air flow.

Stage I upgrade can be installed without engine disassembly. No special tools are required. Requires ECM tuning.

Street legal and/or street compliant statements refer to product meeting 50-State emissions and noise standards in the United States.

Sportster 1200 Stock vs. 1200 Stage I*

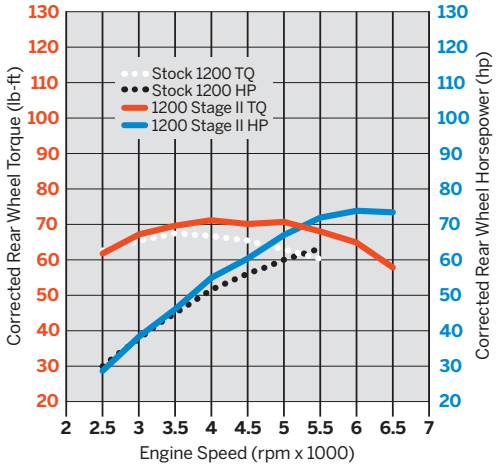

***14-later XL1200 Stage II with Heavy Breather A/C & Street Cannon Mufflers**

STAGE II

STAGE I + CAM UPGRADE

Adding performance cams to a Stage I equipped bike is the next step to improved performance. Cam choices allow you to tailor the engine's performance to your specific needs. A "torque" cam offers on-demand throttle response from low- to mid-RPM at cruising speed. A "power" cam targets high-rpm, wide-open throttle response that keeps pulling right up to redline. ECM calibration tuning is required to accommodate the increased valve timing, and performance valve springs may be required for high-lift cams.

Sportster 1200 Stock vs. 1200 Stage II*

*14-later XL1200 Stage II with Heavy Breather A/C & Street Cannon Mufflers

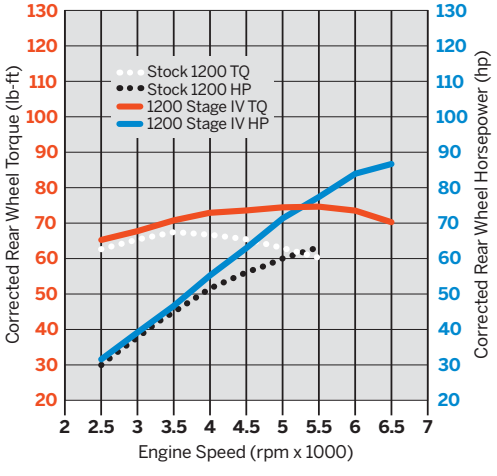

Stage II upgrade requires minor engine disassembly to replace the cam. Special tools and ECM tuning are required.

STAGE IV

STAGE II + CYLINDER HEADS & THROTTLE BODY

For maximum performance improvement, the addition of high-compression pistons, free-flowing ported cylinder heads and a big bore throttle body top off a performance build. The large diameter throttle body and port-matched intake manifold deliver huge volumes of fuel and air to the engine, the smooth passages and larger valves easily dump the mixture into the engine, and the high compression pistons squeeze the air/fuel into a more volatile vapor. When ignited, the result is a major power increase. Designed to satisfy the high RPM, throttle twisting rider, the Stage IV update delivers 20-30% increase in power that keeps pulling right up to the redline, without sacrificing mid-range torque. ECM calibration tuning is required to add more fuel, and a higher-lift cam may be required to deliver maximum power.

Sportster 1200 Stock vs. 1200 Stage IV*

*1200 Stage IV with High-Flow A/C & Street Cannon Mufflers

Stage IV "bolt-on" upgrade requires removal of the engine's top-end and opening the cam chest. Engine remains in the chassis and no machining is required. Special tools and ECM tuning are required.

A. SCREAMIN' EAGLE® 6-SPEED TRANSMISSION AND GEAR SET

Designed from the ground up, the Screamin' Eagle® transmission incorporates many of the best Original Equipment features, like a late-style shifting mechanism and a newly designed "shift ring" system to make this the smoothest shifting Harley-Davidson® transmission available. The "shift ring" system is similar to the system used in the VRSC™ transmission and it slides on the shafts to mate into the gears. This eliminates sliding heavy gears to accomplish the shift and results in smooth, precise and light effort shifting. Sixth gear is a true overdrive, at a .89:1 ratio and the first five gears mimic today's proven 5-speed ratios. The overdrive feature allows you to run a lower engine RPM in sixth gear, at any given road speed. Lower RPM can result in lower vibration, longer engine life and smoother cruising. The Screamin' Eagle 6-Speed Transmission is available as a complete transmission or as a replacement gear set and can be matched with hydraulic or cable-operated clutch controls.

Screamin' Eagle 6-Speed Transmissions feature forged chrome "trap door," forged shifter forks and forged and precisely ground gears. No speedometer or exhaust mount modifications are required. Complete transmissions are ready to install into the chassis and the 6-Speed Gear Set Kits are designed to replace the stock gear set without removing the transmission. Gear Set Kits require slight modification (template included) to the Original Equipment transmission case and include all necessary installation hardware.

C. SCREAMIN' EAGLE VARIABLE PRESSURE CLUTCH

Get more performance from the Original Equipment clutch. The Screamin' Eagle® Variable Pressure Clutch is designed to help put the added power from a Screamin' Eagle Stage Kit to the pavement. This bolt-on kit harnesses the centrifugal force of spinning weights to increase the clutch capacity as engine speed increases. The mechanism applies increasing pressure to the stock clutch pressure plate as RPM rises. The result: High torque-handling capabilities without increasing clutch lever effort at idle. The Variable Pressure Clutch also provides smoother clutch disengagement at lower speed. Kit fits behind most stock derby covers with no modifications. See installation manual for additional accessory derby cover fitment information.

To match the performance demands of your engine, team the Variable Pressure Clutch with your choice of clutch diaphragm springs. We recommend the higher capacity Screamin' Eagle Diaphragm Spring P/N 37951-98 for major performance upgrades.

	Lever Effort	Torque Capacity

E. SCREAMIN' EAGLE PERFORMANCE SLIPPER CLUTCH FOR VRSC™ MODELS

This clutch offers reduced lever effort and improved performance. The resulting reduction in wheel hop allows maximum contact between the tire and the road in wet or slippery conditions. Clutch lever effort is also reduced by 20% in 1130cc and 30% on 1250cc applications.

SCREAMIN' EAGLE® LONGBLOCK PROGRAM

When it comes time to repower your Twin Cam-equipped motorcycle, the first stop should be your local Harley® dealer. They can install a LongBlock replacement engine that is manufactured from 100% new Original Equipment parts and subjected to the same rigorous testing as all Harley® engines. Plus, the replacement engine features a one-year factory warranty and your original VIN stamped on the case.

HARLEY-DAVIDSON® LONGBLOCK PROGRAM

Your engine is the heart and soul of your Harley-Davidson® motorcycle. When the miles start to add up, a Harley-Davidson LongBlock can put the rumble back in your ride simply, quickly, and affordably.

WHY SHOULD I CONSIDER A LONGBLOCK? Unlike an engine rebuild from the repair shop down the street, the Harley-Davidson® LongBlock is manufactured from 100% new Original Equipment components, and is built to the latest factory specifications. Engine includes upgraded Screamin' Eagle® lefty crankcase bearing, Screamin' Eagle cam bearings and Screamin' Eagle performance tappets to handle higher stress loads and performance upgrades. In addition, '99-'06 LongBlocks are upgraded with late-model hydraulic cam tensioners, high-volume oil pump and billet cam plate. '07-'13 103CI and 110CI engines feature factory-installed Automatic Compression Releases.

WHAT DOES THE H-D® LONGBLOCK INCLUDE? The crankcase is pre-assembled with flywheels, connecting rods, bearings, seals, cylinders, pistons, rings, heads, valves, valve springs, tappets and pushrod covers. Also included and ready for Dealer installation are top end rocker arm supports, rocker arms and shafts, pushrods, and breathers. The LongBlock also includes cam support plate, cam plate bearings, cam and timing chain drive, hydraulic tensioners and all required gaskets and new hardware.

ARE UPGRADES AVAILABLE?* You can choose silver or black-highlighted engines to match your styling direction. Bikes originally equipped with Twin Cam 88® engines can upgrade to 95 or 103CI displacement, and Twin Cam 96™-equipped models can be repowered with 103 or 110CI engines, based on specific model fitment. Upgrades require model-specific ECM recalibration (sold separately).

WHAT ELSE DO I NEED? LongBlock is sold without cam shafts, lower rocker boxes, upper rocker box covers, or cam cover. You have the option to re-install your current cams and covers, or select from a wide assortment of performance and custom engine cover options.

FAST AND EASY: Just take your Harley® motorcycle to your authorized dealership. They will remove the engine from the frame, ship the left crankcase half to Harley-Davidson, and in a short time, you will have a new LongBlock back, ready for the dealer to reinstall in your bike. Your engine retains its original Vehicle Identification Number (VIN) for easy title exchange and registration.

**Displacement upgrades are available for vehicles previously equipped with street compliant big bore kits only.*

568 ENGINE TRIM

Milwaukee-Eight™ Engine

A. COOLFLOW™ FAN

Keep your cool on a sweltering summer day. Engineered to maximize rider and passenger comfort in high temperature situations, the CoolFlow™ Fan is the perfect addition if your bike is subjected to parade duty, rush hour traffic, or extreme temperature environments. This wind-tunnel engineered solution is hidden under the seat and, unlike traditional fan kits that try to cool the engine by blowing air across the cylinders and often onto your legs, the CoolFlow Fan keeps the riders comfortable by drawing the heated air away from the rear cylinder and exhaust pipe, and directing it toward the ground.

The CoolFlow Fan features switched On/Off/Auto operation. In the "ON" mode, the fan is active at low speeds, and will turn off when the bike reaches 40mph. As speed lowers, the fan turns back on at 35mph. This gap is intentional to prevent the fan from cycling on and off during low speed changes. In the "AUTO" setting, the fan operates based on a combination of slow vehicle speed and specific engine and ambient temperatures. Built to withstand the harsh motorcycle environment, the all-weather CoolFlow Fan is 100% waterproof and includes everything you need for installation. The plug-and-play design is integrated with the vehicle electronics, so fan operation is indicated in the odometer LCD screen. Your dealer will need to enable the fan in the vehicle's Electronic Control Module (ECM) and you're ready to roll.

Keep your cool. This easy to install Oil Cooler features a thermostatically controlled fan that provides continuous flow of cooling air – even while the bike is idling in traffic or moving at low speed. Ideal for bikes that see parade duty and other low speed or continuous idle situations, the Fan Assisted Oil Cooler is also the perfect addition to a bike modified with high performance components. The fan automatically engages when the engine oil temperature rises, and when in operation, the Fan Assisted Oil Cooler can provide up to a 50 degree drop in oil temperature. And unlike other models, the Harley-Davidson® Fan Assisted Oil Cooler utilizes weather-rated fans and electronics that are designed for the harsh motorcycle environment. Engineered as a bolt-on replacement for the Original Equipment oil cooler, the Fan Assisted Oil Cooler is plug-and-play compatible with your bike's wiring harness. No splicing or rewiring is required.

Oil Coolers – Twin Cam

PREMIUM OIL COOLER KITS

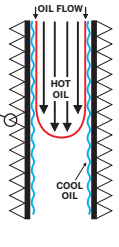

This oil cooler was designed specifically for Harley-Davidson to out-perform all other coolers in the industry. The cooler features a unique "Turbulator" system that evenly distributes oil across the cooling chambers. The air fins are designed to efficiently dissipate heat. The oil cooler has been designed to simplify installation and enhance performance. The large heat exchanger provides excellent cooling efficiency. The kit features a one-piece adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. Thermostat activates at 185°F (85°C). Kit comes complete with mounting hardware and precut oil lines.

Inside View of Premium Oil Cooler with Turbulators

Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Inside View of Conventional Oil Cooler without Turbulators

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

CONTROLS

Grip your ride by the bars and change more than your scenery. Swapping out something as major as a handlebar or as minor as a handgrip or gearshift peg can give your bike a whole new look that's all you.

GENUINE MOTOR PARTS & ACCESSORIES

TOUCH POINTS

From a rider's perspective, the controls are one of the most visual parts of the bike. They are the first thing you touch when you drop into the saddle, and what you see every mile you ride. That makes your controls a prime candidate for special treatment. Styled to put an integrated look just a few wrench turns away, installing one of our hand and foot control collections is a solid first step to an all-out custom journey.

HEATED HAND GRIPS
Keep comfortable on those cool mornings or frigid night rides. Warm hands have a major impact on overall body comfort and sometimes gloves just aren't enough. These thermostatically controlled grips feature variable heat settings controlled with a military grade resistor and use automatic temperature monitoring to adjust to ambient temperatures. With both hands on the grips, they will remain at a constant temperature regardless of changes in outside temperature. The self-contained control circuit and control knob means you have no additional switches or controller boxes to mount and the grips are switched on/off with the ignition to avoid draining your battery. The glueless grip design allows grip removal if you change handlebars or motorcycles.

COMFORT, STYLE OR BOTH?

Every person is unique. Your overall height, arm reach, upper body length and riding style all dictate your relationship to the bike's controls. Add in the desire for a unique, custom look and your handlebar options multiply exponentially.*

YOUR RIDING POSITION

DRAG HANDLEBAR*
Narrow, flat and more aggressive, drag bars provide a straight elbow and neutral hand and wrist position. For maximum comfort, drag bars can be positioned with curved or straight risers to minimize stretch to the controls.

APE HANGER & TALLBOY® HANDLEBAR*
Tall and wide, ape hanger and Tallboy® handlebars provide a classic "fists-in-the-wind" look and can add long-haul comfort for riders with long arms. Because handlebar height is regulated in many areas, check local laws before installing a tall handlebar.

BEACH HANDLEBAR*
Low and wide, a beach bar spreads your arms and gives you room to breathe. Ideal for the rider with long arms, beach bars can be a little too wide for many riders. While selecting a bar, make sure you can reach the hand controls when the handlebar is fully turned.

CHIZELED HANDLEBAR*
For cutting edge style, a Chizeled Bar combines the hands-up feel of a mini-ape with the narrow width of a drag bar. The bar's shoulder-width design keeps the elbows in and the arms straight ahead, and the wrist and hands fall in a neutral palms-down grip.

CHOOSING YOUR HANDLEBAR

RISE is the vertical distance between a handlebar's tip and its base. Adding risers to bars that sit too low can help put hand grips into your sweet spot.

PULL BACK is the distance the handlebar tips come back toward the rider. Greater pull back can eliminate the long reach to the bar for a shorter rider.

WIDTH is measured from tip-to-tip. Make sure the bar isn't too wide so it pulls your hands off the grips when turning.

KNURL CENTER is the distance between the centerline of the bar's knurling. The measurement should match the riser dimension to maximize clamping pressure.

*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake lines for some models. Handlebar height is regulated in many areas. Check local laws before installation.
**1.25" Fat Bar base necks down to fit 1.0" handlebar clamp.

Handlebars – Road Glide®

CHOOSE YOUR ROAD GLIDE® HANDLEBAR

Just about every model of Harley-Davidson® motorcycle features a different stock handlebar. Selected to complement the style or use of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

Choosing a bar for your Road Glide® model is about more than just style – it's about how you approach the road. Where the bar positions your hands, wrists, and arms directly affects how you feel on your motorcycle. For every set of bars, there are three factors at work: Rise, Pullback and width. These three measurements determine your reach to the hand controls and, therefore your overall feeling of comfort and control.

A. ROAD GLIDE TALLBOY® HANDLEBAR*

CHOOSE YOUR BATWING HANDLEBAR
Just about every model of Harley-Davidson® motorcycle features a different stock handlebar. Selected to complement the style or use of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

Choosing a bar for your batwing fairing-equipped model is about more than just style – it's about how you approach the road. Where the bar positions your hands, wrists, and arms directly affects how you feel on your motorcycle. For every set of bars, there are three factors at work: Rise, Pullback and width. These three measurements determine your reach to the hand controls and, therefore your overall feeling of comfort and control.

A. ELECTRA GLIDE® CHROME HANDLEBAR*
This high-quality chrome-plated handlebar is designed to be compatible for use with TGS-equipped '08 Electra Glide® models. Replace your stock polished bar with this 1.0", chrome handlebar that allows you to tuck the wires inside the bar for a clean, finished look.

RISER BASICS

You may think you are perfectly happy with the way your bike is adjusted. But that doesn't mean that it is correctly set up for you. We get used to our bikes—our muscles become trained and we end up accommodating the bike. It is far better to take the time to make the bike accommodate you.

If you are satisfied with your handlebar's width and wrist position, but wish it was just a little higher, lower or closer to you, your dealer can recommend a set of handlebar risers that move the bar into your comfort zone.

ADJUSTING YOUR HAND POSITION

STOCK HANDLEBAR

Just about every model of Harley-Davidson® motorcycle comes with a different stock handlebar. Selected to complement the style of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

STOCK HANDLEBAR WITH RISERS

If the stock handlebar has the correct width and hand position for you, but seems just a little too far away, we offer riser kits that bring the controls within reach. Straight and curved risers are available for many model and handlebar combinations.

FIT SHOP TIPS

FIT SHOP

Here are a few options to consider when outfitting your bike to fit you. Find your model and flip to the pages for more information. For more details, visit **h-d.com/fitshop**.

Getting the fit right may be as simple as adjusting the Original Equipment handlebar and controls. With the bike blocked in the upright position and you in the saddle, your Dealer can loosen the handlebar clamp and rotate the bar for a closer match to your ideal fit.

Once the grips fall naturally to hand, your Dealer can also adjust the hand control lever position. Rotating the switches and levers to a level position puts your wrists in a relaxed position and reduces the strain of lifting your fingers to reach a too-high lever.

*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake hose for some models. Handlebar height is regulated in many areas. Check local laws before installation.

Our goal is to deliver exceptional products that create a deep emotional connection between music and riding. We don't take the easy way out by assuming that louder is better. Instead, we find ways to optimize bass while keeping distortion low. Our audio specialists work hand in hand with our vehicle engineers to optimize speaker enclosures and locations for both the standard and Boom! Audio speakers.

Boom! Audio systems are designed to be loud enough to cut through road noise without sacrificing accurate sound reproduction. All you hear is musical balance and clarity. Each combination of speakers relies on a unique equalization curve programmed into the amplifier to maximize the system's performance. This gives Boom! Audio a clear advantage over other aftermarket systems.

BOOM! AUDIO SPEAKERS
Designed for increased volume, deep bass, and high-output durability, Boom! Audio Speakers feature advanced rare earth magnets are made with neodymium compounded with iron and boron. Neo magnets are light, small and very powerful. They are roughly 10 times stronger than equivalent ferrite magnets, so neo magnets achieve the same strength with one-tenth the size and weight of traditional magnets.

THREE STEPS TO GREAT SOUND

Your bike's factory-equipped Boom!™ Box in-dash audio system and speakers are designed to provide enjoyable full-range sound quality, at a volume level you can hear on the open road.

With the addition of Boom! Audio speakers and amplifiers you'll get louder, ride-enhancing sound – thanks to increased frequency response, lower distortion and strong mid-range performance that cut through wind noise. Designed specifically for your ride, Boom! Audio equipment doesn't just sound great – it's engineered tough to withstand the harsh outdoor environment.

STEP BY STEP UPGRADE

STEP 2–
Add Speakers & Amps

Now we are getting serious. Adding a 3rd pair of Boom! Audio speakers and an additional amplifier delivers the extra punch that only a "wall of sound" can provide. Adding a third set of speakers in the saddlebag lids or in the fairing lowers directs more sound to the motorcycle's cockpit, building depth and presence to the musical experience.

6-speaker Stage I systems are powered by two Boom! Audio amplifiers, and bi-amplified Stage II systems require three dedicated amplifiers.

STEP 1–
Replace the Factory Speakers

The first step toward audio perfection is to replace the Original Equipment speakers with your choice of Boom! Audio speakers and matching amplifier(s). The larger bass and separate mid/high range speaker components deliver increased musical accuracy, and the added power helps cut through the wind and road noise.

4-speaker Stage I systems require one Boom! Audio amplifier, and bi-amplified Stage II systems are powered by two dedicated amplifiers.

STEP 3–
Build the Ultimate System

This is the complete package. Rounding out the system with a fourth set of speakers adds enhanced bass punch and a weighty sound sure to grab attention. The 8-speaker "surround sound" effect puts the rider and passenger inside an envelope of sound for a road-tripping musical experience like no other.

8-speaker Stage I systems are powered by two Boom! Audio amplifiers, and bi-amplified Stage II systems require four dedicated amplifiers.

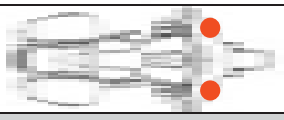

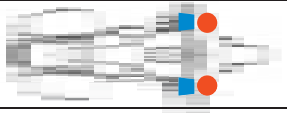

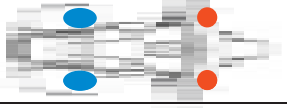

EQ "IQ" TEST

Boom! Audio systems outperform other aftermarket systems because our Audio Engineers develop a unique equalization (EQ) software package for each combination of speakers and amplifiers. A two-speaker fairing setup requires a full range EQ so the speakers deliver the full music spectrum, while a 4-, 6- or 8-speaker system's EQ custom tunes each location's speaker to deliver it's ideal tonal range.

STAGE II BOOM!™ AUDIO SYSTEMS

Boom!™ Audio Stage II systems give you the very best motorcycle sound experience. Stage II systems are based on a bi-amplified, three-way speaker design. Each Stage II speaker features a separate woofer, mid-range, and tweeter element that allow frequencies to be delivered with the optimum driver design. Each speaker is powered by two channels from the amplifier – one for the woofer, and the second for the mid-range/tweeter combination – for a total output of 150 watts/speaker. This doubling of the power allows you to play your music louder with far less distortion than traditional systems.

Boom!™ Audio – Stage II

BOOM!™ AUDIO STAGE II COMPONENTS*

Headline your own concert tour. Big and bold is the best way to describe the musical performance you will experience when listening to your favorite band through a Boom!™ Audio Stage II sound system. The weather-proof 3-way speakers feature high-excursion woofers for extended bass performance, and separate mid- and high-frequency drivers for rich vocals and startlingly real treble notes. Powered by a dedicated 300 watt RMS amplifier, each pair of speakers is capable of producing "filling-rattling" volume. Designed to work seamlessly with the factory installed Boom! Audio infotainment head unit, the Boom! Stage II components are system matched and feature custom tuned static and dynamic equalization that dial in the ideal setup for your ride. And you can choose how far you want to go. From a single pair of fairing mounted speakers and a 300 watt amp to a full bore 8 speaker, 4 amp, 1200 watt system, we've got you covered.

A. BOOM! AUDIO AMPLIFIER KIT

Take your music to the streets. Boom!™ Audio Amplifier Kits allow you to crank up the volume with significantly less distortion. The amplifier provides more power than Original Equipment radio alone, resulting in increased volume, fuller sound reproduction, reduced clipping and lower Total Harmonic Distortion (THD). Unlike aftermarket amplifiers that connect between the radio and the speakers, the Boom! Audio amplifier bypasses the radio's internal power amp to produce the cleanest sound possible. The Boom! Audio Amplifier boosts the pure source signal, minimizing any distortion generated through the speaker output. The system-matched high-output signal features optimized sound equalization for crisp, clear vocals and maximum bass response and the strong midrange response cuts through wind and road noise. The waterproof 4-channel, 75-watts RMS/channel amplifier (300-watt RMS total) has been designed from the ground-up for the harsh motorcycle environment. Fairing Mounted kit includes all mounting hardware and wiring harness. Note: The use of the Boom! Audio Amplifier turns off the radio's internal amplifier.

STAGE I BOOM!™ AUDIO SYSTEMS

Boom!™ Audio Stage I systems take your sound to the next level. When compared to the factory installed Original Equipment audio system, Boom! Audio Stage I speakers feature larger woofers for deeper bass and soft-dome tweeters for better balanced sound quality. Efficient Stage I speakers can be easily powered with the built-in amplifier in the factory-installed Boom Box Infotainment System, or with the addition of Boom!™ Audio amplifiers, the larger speakers can produce more volume at all frequencies. A custom EQ was developed for each configuration of speakers to get the most out of the Stage I system.

700 AUDIO & GAUGES

Boom!™ Audio – Stage I

A. BOOM!™ AUDIO AMPLIFIER KIT

Take your music to the streets. Boom!™ Audio Amplifier Kits allow you to crank up the volume with significantly less distortion. The amplifier provides more power than Original Equipment radio alone, resulting in increased volume, fuller sound reproduction, reduced clipping and lower Total Harmonic Distortion (THD) than head unit alone. Unlike aftermarket amplifiers that connect between the radio and the speakers, the Boom! Audio amplifier bypasses the radio's internal power amp to produce the cleanest sound possible. The Boom! Audio Amplifier boosts the pure source signal, minimizing any distortion generated through the speaker output. The system-matched high-output signal features optimized sound equalization for crisp, clear vocals and maximum bass response and the strong midrange response cuts through wind and road noise. The waterproof 4-channel, 75-watts/channel amplifier (300-watt total) has been designed from the ground-up for the harsh motorcycle environment. Fairing Mounted kit includes all mounting hardware and wiring harness. Note: The use of the Boom! Audio Amplifier turns off the radio's internal amplifier.

Boom!™ Audio – '06-'13 Touring

A. BOOM!™ AUDIO AMPLIFIER KITS

Take your music to the streets. Boom!™ Audio Amplifier Kits allow you to crank up the volume with significantly less distortion. When teamed with Boom! Audio Speakers, the Boom! Amplifier provides 50% louder (6dB) system output than other popular aftermarket systems at the same volume setting. The system-matched high-output signal features optimized sound equalization for crisp, clear vocals and maximum bass response and the strong midrange response cuts through wind and road noise. The amplifier features 40-watt/channel (160-watt total) output. Kit includes all mounting hardware.

NO NEED TO SHOUT

Riding alone is a good way to unwind and clear your head. But if you've got a passenger, or you're riding with a group, inevitably you'll need to communicate with others. A tap on the helmet, a hand signal, or frantic waves only get you so far. Welcome to Boom!™ Audio wireless Bluetooth® technology.

Boom! Audio Bluetooth headsets allow riders and passengers to connect on the open road. These comfortable headsets permit a number of riders to pair into the network and "rebroadcast" signals up and down the line to extend the effective range. In addition to driver-to-rider intercom and bike-to-bike communication, these wireless headsets let you connect to cell phones, GPS devices, and personal music players.

The total distance increases as the number of riders increase, but the distance between each rider decreases as you add additional riders to the communication chain. Rider-to-rider connectivity may vary depending on terrain and traffic.

A. BOOM!™ AUDIO 20S BLUETOOTH® HELMET HEADSET

The Boom!™ Audio 20S headset is a state-of-the-art Bluetooth 4.1 communication system. With the 20S, users can call handsfree with their Bluetooth® mobile phones, listen to stereo music or voice instructions of GPS navigation by Bluetooth wirelessly, and have intercom conversations in full duplex with a passenger and/or other riders.

The weather resistant Boom! Audio 20S Full Helmet Headset permits you to enjoy your group ride by keeping you in touch with up to eight other riders in crystal-clear HD audio – up to 2.0 km (1.2 miles) away – through the Group Intercom™ feature. The 20S uses the Universal Intercom™ protocol so it can be paired with many other available Bluetooth headsets. The 20S headset features Audio Multitasking™ technology that enables intercom conversation while simultaneously listening to the built-in FM radio or Bluetooth-sourced music or GPS instructions. Audio Multitasking allows a seamless integration of incoming and outgoing audio, and eliminates the interruption-based audio functions of many Bluetooth communication devices.

The unit provides a sleek and aerodynamic design that offers a versatile jog dial that maximizes the ease of use for riders. The user interface makes setting up and pairing your 20S incredibly easy. And once you're on the road, complete control of the 20S can be done through hands-free voice commands. Intuitive technology ensures safe, controlled riding as you seamlessly move through music, phone, and intercom features. Linking up your 20S via the available smartphone app (for Android® or iPhone®) allows you to configure device settings, set groups of intercom friends, and access a Quick Guide. The 20S also offers the ability to pair with up to two mobile phones for convenient hands-free calling.

S20 talk time is 13 hours, and the device can remain charged for up to 10 days in standby mode. Kit includes the S20 headset unit, universal helmet clamp, two in-helmet stereo speakers, static and wired boom microphones, micro USB power and data cables, and all mounting hardware.

HARLEY-DAVIDSON®

LIGHTING

Light your way. See more. High visibility and high style meet in endless combinations of high-tech Harley-Davidson® Genuine Motor Parts & Accessories headlamps, brake lights, and auxiliary lighting.

GENUINE MOTOR PARTS & ACCESSORIES

A BRIGHT IDEA

Whether you want to grab a little more attention on the boulevard or light up the dark desolate highway, Harley-Davidson® LED lighting will get you noticed. Available for most models, LED headlamps feature high- and low-beam performance that provides a focused beam of light down the road and a pool in front of the motorcycle. Solid-state LEDs are designed for long life and the shock- and vibration-resistant lamp assemblies mount into existing housings for easy installation.

DARE TO COMPARE

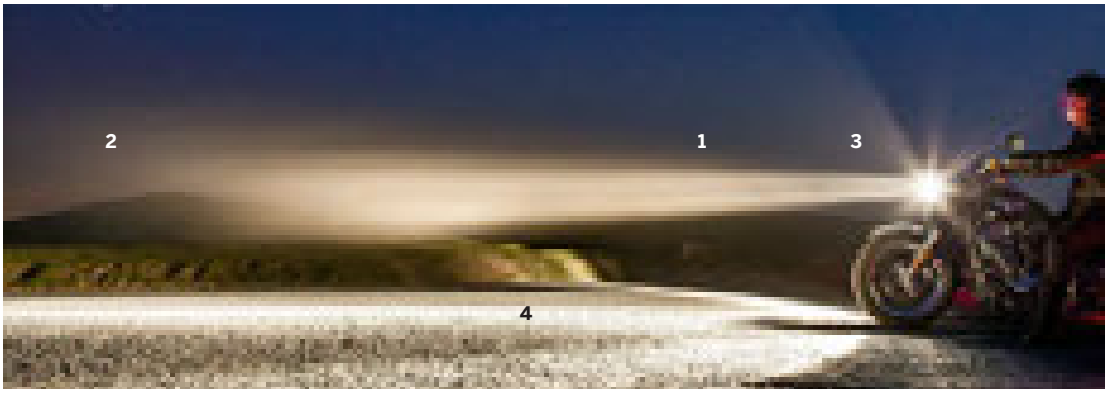

Harley-Davidson® LED Headlamps offer low- and high-beam performance that is superior to traditional halogen bulbs. The wide curb-to-curb low-beam pattern provides a great around-town view and the focused high-beam adds extra punch down the center of the lane.

LED performance characteristics you can see:

1 Clarity and direction of beam
2 Brightness and depth of light
3 Focused or wasted light
4 Full coverage or gaps in light
5 Curb-to-curb coverage
6 Illumination of reflective markings

DAYMAKER™ PROJECTOR LED HEADLAMPS

Daymaker™ LED Lamps are brighter and provide a superior light pattern than standard incandescent bulbs. These LED lamps produce a whiter noon-day sun color impression that is easy on the eyes and appears more natural to the rider. The night-time beam pattern is focused on the road ahead, and is engineered to reduce wasted light that impacts oncoming traffic. The solid-state LEDs are designed for long life and low energy draw, and installation of the shock- and vibration-resistant lamp assembly is quick and easy with a plug-in connection to the factory headlamp wiring.

WHEELS

Let your personal style roll on and on. Make more of a statement, from classic to cutting-edge forged models, and let your wheels do the talking.

GENUINE MOTOR PARTS & ACCESSORIES

STRENGTH AND STYLE

From a visual perspective, the wheels, sprocket and brake rotors make up almost half of the motorcycle's profile, and they set the styling direction for the whole bike. Choose wisely. Harley-Davidson® forged and cast wheels undergo thousands of hours of real-world testing to meet the highest standards of performance and durability.

WHEEL FINISH OPTIONS

MIRROR CHROME

Looking for the ultimate flash? Choose Mirror Chrome wheels. To achieve this rich look, our dedicated team of polishers spends hours preparing the wheel for its finish. All visible wheel surfaces are micro-polished to a glass smooth finish, and special masking is applied to prevent contamination to threads and bearing bores.

CONTRAST CHROME

Can't make up your mind? Choose Contrast Chrome wheels. We start with a hand polished wheel, and add a proprietary finish that features both gloss black paint and chrome highlights. The combination produces a stunning contrast that lightens the wheel's profile by visually thinning the spokes, rim and hub.

GLOSS BLACK

Want a sinister look? Choose Gloss Black. First, we polish all the surfaces. Then we apply the rich coating for a finish with incredible depth and shimmer. The all-black spoke and rim blend with the tire sidewall to deliver a massive profile on a blacked-out bike, but the deep gloss surface holds its own in the company of chrome.

CARE & FEEDING

The road provides plenty of nasty elements that can be potentially damaging to the finish of motorcycle wheels. Harley® Wheel & Tire Cleaner safely removes brake dust and road grime from wheels, tires and whitewalls in seconds. Just wet the wheel, spray on Wheel & Tire Cleaner, work it into tight areas with a Spoke Brush, and rinse away the dirt.

WHEEL ORDERING PROCESS

Step 1: Select a wheel part number for your specific fitment.

Step 2: Select the wheel installation kit for your specific application (model, year, and front or rear). Note: If your model is not specified in the wheel fitment, a wheel installation kit will not make the wheel fit your model.

Step 3: Refer to the instruction sheet included in your wheel kit to determine the necessary parts required from the installation kit.

Step 4: Use only Harley-Davidson specified tires. See a Harley-Davidson® dealer. Using non-specified tires can adversely affect stability, handling or braking, which could result in death or serious injury.

Custom Body Components

A. CUSTOM WRAPPED FRONT FENDER

A. CUSTOM WRAPPED FRONT FENDER

Give your bike a big hug. This all-steel fender is shaped to show off the full profile of your 19" front wheel. The apron-less fender wraps almost 180 degrees around the front tire for a clean, custom appearance, and the low profile cutaway design exposes the wheel from hub to rim for maximum visual impact. Designed for mistake-proof installation, the fender is pre-drilled to fit Original Equipment fender mounting bosses, and does not require additional fender spacers or install kits. Available in Vivid Black or primed and ready-to-paint finish.

B. CUSTOM STRETCHED SIDE COVERS

Add a long, lean look to the profile of your Touring bike. These Stretched Side Covers are sculpted to smooth the visual transition from the side of the bike to the front of the saddlebag, and trade the traditional stepped look for a rearward flowing design. Shaped to flare out and down the saddlebag face, the sleek side covers complement the body lines and eliminate the saddlebag guard clearance notch at the lower corner for a seamless flow. And unlike some aftermarket designs, these side covers fit without significantly compromising the available passenger foot space. The one-piece covers are a snap-in replacement for the Original Equipment covers, and require no bonding or modification for installation. Available in Vivid Black or primed and ready to paint finish.

Fits '14-later Touring models. Does not fit with Auxiliary Power Port P/N 69201099.

Just spray it on and hose it off. Quick Wash gets into hard-to-reach spaces and cleans without scrubbing. Sheeting action rinses clean and prevents spotting. Available in easy-to-handle trigger pump bottles and convenient refill containers.

Motorcycle Cradles & Tie-Downs

A. CRUISER CRADLE WHEEL CHOCK

This sturdy aluminum wheel chock will hold your bike securely on the ground, on a trailer or in the back of a pickup truck. The one-person operation simplifies securing the bike for transport. Load the bike into the Cruiser Cradle, dismount and the bike remains upright. C. HARLEY-DAVIDSON HELMET/JACKET SECURITY CABLE[2]

This handy cable is a great complement to the Harley-Davidson® Helmet Lock. Slide one end through your jacket sleeve or luggage, hook the loops at the end of the cable onto the Helmet Lock and attach it to your bike. And, if your helmet does not have D-rings, you can pass the cable through your helmet's chin piece, loop the ends through your Helmet Lock and lock it to your bike. Now your jacket, luggage and helmet are locked to your bike. When you're finished, it will recoil back to its original length and will slip easily into your pocket. The cable is made from 3mm thick nickel plated steel cable, is only 4.5 inches (11cm) long when coiled, stretches up to 6ft (180 cm) and has a load capacity of 200 lbs (100 kg).

MORE THAN AN OIL CHANGE

Maintaining your Harley® motorcycle can be almost as enjoyable as riding it. The hours spent in the driveway inspecting every part and every surface keeps you in touch with the bike. But when it comes to major service, remember that your Harley-Davidson® dealership's technicians are specially trained to properly diagnose and maintain your bike. Whether it's your first 1,000-mile checkup or a 20,000-mile service, a Harley-Davidson dealership should be your destination.

THE WELL-EQUIPPED GARAGE

Adventure comes at a price. As mileage adds up, moisture, dust and road debris can take their toll on the bike's wear-prone surfaces. But, if you have the right tools for fighting through miles and miles of the highway's abuse, you'll be more than ready to keep your bike in top running condition.

MAINTENANCE

Keeping your bike road-ready takes a special touch. Topping off the fluids, checking the tire pressure, and keeping the battery fully charged are no problem when you have the right Harley-Davidson maintenance tools in your garage.

TOOLS

Every bit as rugged as our motorcycles, Harley-Davidson tools and tool kits boast a compact, lightweight design developed specifically for use on your Harley.

FLUIDS

Whether it's oil, brake fluid or Screamin' Eagle® SYN3® Synthetic Motorcycle Lubricant, all Harley-Davidson fluids are developed exclusively for use in Harley-Davidson motorcycles, making them a must-have in your garage.

FILTERS

Don't overlook the essentials. Harley-Davidson air and oil filters keep debris out of your engine to help keep it healthy. So replace them routinely and insist on using only the Genuine article.

BATTERIES

Genuine H-D® Batteries are engineered for the harsh motorcycle environment, and feature AGM technology for higher cold cranking amps, longer life and improved rechargeability.

TIRES

Harley-Davidson co-branded Dunlop® and Michelin® tires are ready to go the distance. Extensively tested in real-world conditions, our recommended tires are engineered for long life, comfortable ride and competent handling.

OIL CHANGE ACCESSORIES

A. LOW PROFILE OIL DRAIN PAN

The Drain Pan is large enough to catch the oil from the entire length of the primary, and is sized to hold and drain an inverted primary cover. The Drain Pan features a raised hardware corral, a filter drain surface, and a pressure vent hole to prevent messy oil burping. The drained waste oil is sealed safely inside the pan with high-quality gasketed caps and plugs. Convenient carrying handle simplifies transport to an approved waste oil facility.

Tire Inflators

A. TIRE PRESSURE GAUGE AND FILL VALVE

Simplify checking the air pressure level and filling the tires on your motorcycle. This Tire Pressure Gauge features an 18" flexible hose and 2-way air chuck with both a 45° fill port and a unique side fill port that provides easy straight-in access to hard-to-reach motorcycle valve stems. The dual-range instant-read gauge measures pressures from 0-60 psi and 0-400 kPa, and is protected from impact and abrasion by a thick rubber collar. Designed to fit an air compressor with a standard 1/4" quick-disconnect coupler, this gauge allows you to check the pressure and fill the tire without removing the chuck from the tire. Just apply the chuck to the valve stem, read the pressure, and add air by depressing the comfortable trigger leaver. And for checking tire pressure on the road, you can use this tool like any standard tire gauge.

12700096 **$79.95**

B. COMPACT AIR COMPRESSOR WITH LIGHT

Correct tire pressure is crucial to safe operation and long tire life, but checking the pressure, finding a gas station with a working air pump, and filling the tire is a chore that many of us ignore. The Compact Air Compressor is designed to simplify this necessary procedure. The compact, lightweight 12V pump is designed for life on the road. The all-in-one pump plugs into your bike's battery charging harness, and features a built-in 0-160 psi pressure gauge and bright LED work light. The 11" air hose and 6' fuse-protected power cord easily reach the front and rear wheels, and are stored in convenient compartments when not in use. The lightweight pump features durable, impact-resistant construction, and is small enough to fit easily in a saddlebag or strap-on luggage. Kit includes pump, valve stem extension, and nylon carrying bag.

12700020 **$42.95**

C. VALVE STEM EXTENSION

Sometimes there's just not enough space around the tire's valve stem for the gas station air chuck and hose to reach. Brake rotors, sprockets and saddlebags get in the way and keep the air chuck from making an airtight seal. When that happens, this Valve Stem Extension provides easy access. Simply screw the extension in place on the stem, fill the tire to the proper pressure, remove the extension, and replace the valve stem cap. Then toss the extension in your saddlebag or tool roll for the next time.

BODYGUARD IN A BOTTLE

Introducing a breakthrough in powertrain protection – Screamin' Eagle® SYN3® Full Synthetic Motorcycle Lubricant. For use in engines, transmissions and primary chaincases, it's just the latest in a line of products formulated specifically to keep your Harley® motorcycle running strong, mile after mile.

ENGINE OIL FAQ'S

How often should I change my motorcycle engine oil?
You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants during this time period.

Can I go longer between oil changes by changing the filter?
NO! The job of the oil filter is to remove dust, soot and other solid matter. Filters cannot remove water, gasoline or acids and cannot do the job of oil additives that have been used up. You should change your oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter or prior to winter or extended storage periods.

What viscosity grade should I use in my Harley Motorcycle?
The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson® Motor Oil. The SAE 50 H-D® Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

SYN3® ENGINE, PRIMARY AND TRANSMISSION OIL FAQ'S

What are the key benefits to using SYN3® Motorcycle Lubricant?
- SYN3® Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature stability, and superior overall field performance.

What's the difference between synthetic and petroleum-based lubricants?
Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from basestocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

What does SYN3 full Synthetic Motorcycle Lubricant do for my drivetrain?
SYN3 Full Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson® 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

The "V" trimmed ground electrode reduces shrouding of the flame front to promote flame propagation, and the fine wire center electrode enhances startups and ignitability. Screamin' Eagle Plugs feature Ribbed Core Technology (RCT) that provides resistance to fouling, and are designed with Original Equipment-style noise suppression to prevent electrical interference with radios and CB communication equipment. Works great in racing applications where rich air/fuel conditions are required. Unique style with Screamin' Eagle logo. Sold in pairs.

B. HARLEY-DAVIDSON® GOLD SPARK PLUGS

A special thread and shell coating ensures quick and easy removal from aluminum heads and resists corrosion. A gold palladium insert extends life and improves resistance to corrosion. The tapered tip provides better spark exposure to air/fuel mixture and allows the mixture to flow more easily through gap area for maximum combustibility. Fouling resistance is improved with smaller diameter center electrode wire and insulator tip. Plus, a copper-cored ground electrode runs cooler for extended life.

ONE-YEAR OVER-THE-COUNTER PARTS AND ACCESSORIES WARRANTY

Harley-Davidson warrants that street legal Genuine Motor Parts ("Parts") and street legal Genuine Motor Accessories ("Accessories") that are purchased on or after January 1, 2012 through an authorized dealer will be free from factory defects, under normal use and service, for a period of one year starting from the date of retail sale and delivery (not date of installation). Because this limited warranty covers only Parts and Accessories, labor is not covered. This limited parts warranty does not cover defects or damage due to abuse, misuse or improper installation. This parts warranty applies to Parts and Accessories you or an aftermarket shop have installed, but only for defects in manufacturing — not conditions caused by the improper installation.

This Parts and Accessories warranty is separate and distinct from the limited factory warranty that applies to your stock motorcycle. This Parts and Accessories warranty does not extend or modify the factory warranty that applies to your motorcycle. It only covers the street legal Genuine Motor Parts and street legal Genuine Motor Accessories added to your motorcycle.

This Parts and Accessories warranty does not cover defects, damage or premature wear to your motorcycle that are caused by the installation or use of Parts and Accessories, even those installed by an authorized dealership. Examples include, but are not limited to performance-enhancing powertrain components or software, exhaust systems, non-approved tires, lowering kits, handlebars, add-ons connected to the factory electrical system, etc.

The fact that Parts or Accessories are labeled or branded Harley-Davidson, or are sold or installed by an authorized dealership, does not necessarily make them appropriate or warranted for the make and model of your motorcycle. The use of Parts and Accessories not designed and tested for your motorcycle may have negative consequences on the performance of your motorcycle and may create conditions not covered by the limited factory warranty.

The remedy for breach of this limited Parts and Accessories warranty is expressly limited to the repair or replacement of any component that proves to be defective, and does not extend or create liability for consequential damages, costs or expenses, including loss of time, inconvenience, or loss of use of the motorcycle. Any implied warranty, including warranty of merchantability or fitness for a particular purpose, is expressly limited to the duration of this limited one-year Parts and Accessories warranty, or to the shortest duration permitted by the laws in your state.

EXCLUDED COMPONENTS:
All Genuine Motor Parts & Accessories will qualify for the one-year over-the-counter warranty, with the following exceptions:

- Tires
- Chemicals
- Premium Luggage (two years)
- Audio and Navigation (two years where applicable)
- Non-street legal components (including Screamin' Eagle® Pro)
- Anything with a manufacturer/factory warranty
- Other disposable and consumable items

To obtain warranty service, return the affected component(s) with proof of purchase, at your expense, within the limited warranty period to an authorized Harley-Davidson® dealer.

Harley-Davidson Parts and Accessories Division, a facility of Harley-Davidson Motor Company, is registered to International Quality Standard ISO 9001:2008.

The sale or use of these parts or accessories does not grant the purchaser a license or other right under any Harley-Davidson patent.
